## TERMS OF SALE

1. All bids are to be per lot; no lots will be broken. In the event of identical bids on the same lot, the lot will be awarded to the first bid received. In the event of a dispute during floor bidding the auctioneer may at his discretion immediately put the lot up for sale again.

2. All sales are strictly for cash payable in U.S. dollars drawn on a U.S. bank. Invoices must be paid within 5 days of receipt. Shipping, handling, postage and registration charges will be added for lots delivered by mail. All bidders not furnishing resale permits will be responsible for sales tax as required under the laws for lots delivered in the state of California. Any account not paid within the prescribed terms as outlined above will be billed additional interest and collection charges.

3. Bidders not known to us must furnish satisfactory references and/or a deposit equal to 25% of the bids submitted (which will be applied to purchases; any difference will be billed; any overage will be refunded). We reserve the right to obtain payment in full before delivery of the lots from any successful bidder even if satisfactory references are submitted. Title does not pass until lots are paid for in full.

4. No "buy" or unlimited bids will be accepted. No bids will be accepted from minors. The auctioneer and/or the cataloguer reserves the right to refuse any bid which, in our opinion, is not made in good faith or does not qualify credit-wise.

5. All items are guaranteed genuine.

6. We cannot be responsible for your errors in bidding, so check your bid sheet carefully. Please bid in even dollar amounts. All bids not in even dollar figures, including those increased by 10% to 20% (see our special service on the bid sheet), will be rounded off to the lower whole dollar amount. All bid sheets must be signed.

7. Auction sales are not approval sales. Any lot may be examined before bidding. No lot may be returned by a mail bidder without our permission in writing. Requests to return coins must be made in writing within three days of receipt of the coins. Late remittance for purchases, however, is cause to negate this privilege.

8. No lots may be returned for any reason by floor buyers (including those acting as agents for others). All floor sales are final.

9. Any claims involving errors in the catalogue or for other reasons must be made within three days of receipt of the coins. Bowers and Ruddy Galleries acts as agents for the various consignors. For this reason, no claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the bidder and the consignor, without involvement or responsibility of Bowers and Ruddy Galleries and/or the cataloguers. Bowers and Ruddy Galleries reserves the right to include its own material in any auction. In the event of a typographical error or attribution error or other error, the cataloguer reserves the right to withdraw any item from the sale without notice, or, if the error is discovered at a later date, to refund the buyer's money without further obligation. By placing a bid in this sale you agree that this transaction and these terms shall be construed in accordance with the laws of the State of California. Any controversy or claim arising out of or relating to this sale shall be settled by binding arbitration in Los Angeles, California, in accordance with the rules of the American Arbitration Association, and judgement upon the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof.

### ALL ILLUSTRATIONS ARE OF THE ACTUAL COINS BEING SOLD

A WORD ABOUT GRADING: United States coins have been graded using our interpretation of the ANA system. For added clarity, the additional intermediate terms MS-63, MS-67, and MS-69 have been used in the Uncirculated or Mint State area, in addition to the usual MS-60, MS-65, and MS-70.

## INSTRUCTIONS FOR MAIL BIDDERS

*Deadline for receipt of mail bids: Noon Monday, January 21, 1980. We recommend that you mail your bid sheet at least ten days prior to this date.*

Be sure to read the TERMS OF SALE as they apply to mail bidders as well as floor bidders. Also see our *Helpful Mail Bidding Suggestions* in this catalogue.

A bid sheet has been provided with this catalogue. Double check your bids before sending them, for we cannot be responsible for any errors on your part. Please submit your bids in United States dollars. Be sure to sign your bid sheet. Mail your bids early! Deadline for receipt of mail bids is Monday, January 21, 1980.

If you bid by mail we will act as your agent and will buy for you under your bid if there is a spread of 5% to 10% or more between your bid and the next highest bid. At Bowers and Ruddy Galleries there is no commission or so-called "buyers's charge" to pay when we handle your mail bid. Each bid will receive the careful attention of our staff.

In the case of tie bids, the earliest bid received is awarded the lot. Please check the catalogue carefully. This outstanding auction sale offers you a truly significant opportunity to acquire some choice and beautiful pieces.

# Helpful Mail Bidding Suggestions

by Robert Korver  
Manager, Auction Department

Bidding in this sale can be an interesting, enjoyable, and numismatically rewarding experience. If you're an old-time bidder with us you may find some of my comments will increase your bidding success. If this is your first sale then I particularly recommend that you read my commentary. I've numbered the paragraphs for reference in the event that you wish to ask further questions about any aspect. Have a question? You get *personal service* at Bowers and Ruddy Galleries. Write or call and I or a member of our Auction Department staff will gladly answer it.

1. Read the Terms of Sale in the front of the catalogue. These terms define your obligation when you submit a bid sheet.

2. Mail your bid sheet as early as possible. This is particularly important if you're a new bidder, for it takes us time to check your references. Also, this assures that your bid sheet will be received before the sale. A bid sheet mailed a few days before the sale might not reach us until a week later—at which time the coins have all been sold to others!

3. I've found it best to use a *work sheet* to compile bids. In this way you can check back and forth throughout the catalogue, make changes and revisions, and so on. Then when you've decided on your final bids enter them on the bid sheet. Try your best to keep the bid sheet neat and clearly understandable, listing the lots in order.

4. If you are a new bidder, send along references and a 25% deposit.

5. Be prepared to pay in full for all lots for which your bids are successful. Don't bid more than you want to pay! Review your financial circumstances carefully before bidding.

If you are awarded lots you are legally bound to pay for them.

6. Please keep current price levels in mind when bidding. While high and low prices sometimes occur, most items sell within market ranges. If a popular coin sells for \$500 on the retail market, chances are not good that a bid of, say, less than \$400 will win it. On the other hand, chances are excellent that a bid in the \$500 to \$600 range will be a winner. There is no harm in bargain hunting, but as your time is valuable (and so is ours) it is most productive if you keep current values in mind while bidding!

7. Auction invoices are due upon receipt unless *prior* credit arrangements have been made with us.

8. You may pay for your auction lots with Visa or Master Charge, but a small percentage increase will be added to your invoice to cover our charges in this regard.

9. Be sure to sign your bid sheet.

10. Ink is best for writing bids. Pencil tends to blur.

11. If bid changes are necessary, do not over-write any figures. Instead, cross them out completely and re-enter the bids.

12. Put your telephone number on the bid sheet. In this way we can call you if there is any question about a bid.

13. Submit bids in even dollar amounts. Cents and fractional dollar amounts will be ignored.

14. Check your bid sheet carefully. You will be responsible for any bids on wrong lots or for the wrong amounts. Please, please be careful!

15. Don't forget to take advantage, if you wish, of the optional 10% or 20% increase to really help your chances of being a successful bidder.

16. If you wish to limit your total expenditure, please write MAXIMUM EXPENDITURE \$\_\_\_\_\_ and the amount at the *top* of your bid sheet. You can then submit bids for amounts up to *four times* the amount of the maximum expenditure. This is a *personal service* and a Bowers and Ruddy customer representative will personally attend to your bid sheet by bidding from the auction floor, buying lots for your account until your authorized expenditure is reached. Due to the bookkeeping involved, this service is offered only to bidders with maximum expenditures of \$1000 or more. MAXIMUM EXPENDITURE and "ONE LOT ONLY" bidding cannot be combined.

17. Up to five lots may be grouped with brackets for a "ONE LOT ONLY" purchase, if you wish to purchase only one example of a coin of which several examples appear in the sale. Such lots should be bracketed with the notation "ONE LOT ONLY" appearing.

18. Lots may be inspected by mail prior to the auction. Please write or call for further information.

19. Our Auction Department is here to serve your needs. We really appreciate your interest and business and will do anything we can to make auction bidding by mail more enjoyable for you. We look forward to receiving your bids.

20. If you want to *sell* your coins by auction, call or write for our free, informative brochure, *How to Sell Your Coins for the Best Price*.

THE COLLECTION OF  
**Dr. Richard P. Ariagno**

PART I

BOWERS & RUDDY GALLERIES  
PUBLIC AUCTION SALE  
JANUARY 24-25, 1980

# Introduction

It gives us great pleasure to present the first part of the outstanding collection formed over a long period of years by Dr. Richard P. Ariagno, distinguished Chicago surgeon. The present catalogue contains a selection from Dr. Ariagno's United States holdings as well as material from other consignors. Coming in the future is Part II of Dr. Ariagno's collection, one of the finest selections of ancient and world coins ever to cross the auction block. The sale of this material is scheduled for later in the present year.

Dr. Ariagno has been collecting coins since 1934. In his own words:

My interest in coins began at the age of ten, when my mother gave me a copy of B. Max Mehl's *Star Rare Coin Encyclopedia* and a few old coins that she had saved. Later I received Wayte Raymond's *Coins of the World* and various foreign pieces that my father obtained in his business. With the advent of World War II, followed by several years of college and medical school, my collecting instincts were laid aside.

Some years later, when firmly established in the practice of medicine and possessing a great interest in history and geography, my pursuit of coins began in earnest. Being of a romantic nature, coins lent a fascination for the people, places and events that they represented. This explains the wide diversity of my main collection [which will be offered by us later in the year], transversing coinage from its inception in Lydia, through the Hellenistic, Roman, Byzantine, Arabic, and Medieval periods, and encompassing the rise and fall of the great European states.

Secondary to collecting coins was the gradual accumulation of several hundred volumes pertaining to coins and the history which they represented. In disposing of my collection as I near retirement, I can reflect on the countless hours of relaxation and knowledge gained.

United States coins in the present catalogue include over 100 dates of the popular double eagle denomination. An 1879 \$4 stella will likewise attract attention, as will an Uncirculated 1835 half eagle. Also in the gold series are two outstanding eagles, 1797 and 1799, in high grades.

The silver specialist will have the opportunity to bid on some outstanding Liberty walking half dollars, several rare Proof trade dollars, and a nice selection of commemorative coins. American copper-nickel coins as well as early pieces of Connecticut and other numismatic issues will also be of interest.

Presented for bidding competition is one of the finest offerings of paper money to appear in any of our recent sales. The beautiful, popular, and rare \$2, \$5, and \$10 "rainbow" notes, an outstanding 1896 Educational \$5, and two notes from Tombstone, Arizona, a \$10 and \$20, are among the more interesting issues.

Among ancient and world coins from various consignors (not including Dr. Ariagno) are to be found such items as an electrum stater of Carthage, an example of the highly prized 1930 Australian penny, and for the numismatist interested in more modern issues, several dozen lots of gold coins issued in our own time by the Franklin Mint.

Check each page of the catalogue carefully. The index at the end of the volume will direct you to areas of special interest. Be sure to read our "Instructions to Bidders" and "Helpful Mail Bidding Suggestions" at the front of the catalogue. We cordially invite you to attend the sale in person. You will enjoy the bidding activity and the thrill of auction competition. Or, if your schedule does not permit you to attend in person, then plan to bid by mail, as most of our clients do. Do you have any questions concerning estimates, bidding procedures, auction descriptions, or anything else? Bob Korver, manager of our Auction Department, and his capable staff will cheerfully attend to your needs. Out of state clients are invited to use our toll free line: (800) 421-4224.

The present sale is held in conjunction with the Numismatic Association of Southern California convention, traditionally one of the year's most active. While we can't guarantee the weather, in general we know that the latter part of January is usually fairly warm (in comparison to other areas of the United States), and for sure we know the tourist attractions of southern California—Disneyland, Knott's Berry Farm, Universal Studios, the Huntington Library and Gardens, the J. Paul Getty Museum, and other places of importance or interest are open and offer many educational and recreational opportunities. Consider bringing your family with you. There's plenty for them to do while you are attending the NASC convention and participating in our auction sale. We express thanks and appreciation to the Numismatic Association of Southern California officers and officials who selected us to handle their auction sale, the latest of several auctions we have held for this prominent collecting group.

A really fine auction is about to begin, a sale with many opportunities for the collector, investor, and dealer. The sale gives you the opportunity to acquire the coins and notes you want to buy at the price you want to pay. Could anything be more ideal? The Dr. Richard P. Ariagno Collection sale catalogue is now in your hands. We have done our part; now it's up to you. Each and every one of us on the staff of Bowers & Ruddy Galleries wishes you the best of luck and success. We very much appreciate your past business and interest, and hope that the present sale will merit your participation and will result in your acquiring some very desirable pieces.

Sincerely,

A handwritten signature in black ink, appearing to read "Q. David Bowers". The signature is fluid and cursive, with a large initial "Q" and a stylized "B".

- 1 1723 Rosa Americana penny. VG-8, rough, scratched on obverse, discolored.
- 2 1723 Rosa Americana twopence. This has details of VF-20 or better but is very rough.
- 3 1783 Georgius Triumpho. VG-8, excellent surfaces, light chocolate brown, small obverse rim cut.
- 4 1783 Nova Constellatio. Pointed rays, small U.S. Crosby 2-B. Choice VF-30, glossy medium brown, some light pitting on reverse and a couple of small edge bruises. Despite the 1783 date, these were practically unknown in America before 1785. New York City newspapers as late as January, 1786 were still speaking of these as newly appearing and unfamiliar coins.
- 5 1785 Nova Constellatio. Pointed rays, Crosby 3-B. VF-20, light brown with a few marks, none serious. Extensively rusted dies (as usual) weakening the rays; the letters in NOVA are mere blobs from the same cause.
- 6 1788 Massachusetts cent. EF-40, chocolate brown, moderate obverse planchet defects and a few light rim bruises.
- 7 1786 Vermont. Ryder-6, the VERMONTENSIMUM variety. Sharpness of Choice VF-30, less planchet defects than usual, many obverse pinscratches. The curious variety with the U in PUBLICA punched far too low, then corrected.
- 8 1786 Vermont. Ryder-9, the famous *Baby Head*. VF-20, usual severely defective planchet. Previously sold as "one of the finest known, probably condition census." While it is hardly that, this is still far above average for the variety. The distinctive head appears to loosely copy that on the 1786 Connecticut copper, Miller 3-D.1.
- 9 1787 Vermont. Ryder-13, the BRITANNIA variety. Fine-12, a couple of minor planchet defects. The reverse is very weak as always on the variety; the letters NIA can be made out.
- 10 Pair of 1788 Vermont coppers, unattributed. Good-4 and AG-3. (Total: 2 pieces)

- 36 1788 Mailed bust right. Miller 5-B.2. (R-5). VG-8, charcoal black, lighter on relief areas, free of serious defects.
- 37 1787 Nova Eborac (N.Y.) copper. Figure seated left. VF-20, dark gray with a few darker spots on both sides. Usual impression with weak rims. Scarce and unappreciated, New York coppers are many times rarer than those of Connecticut, New Jersey or even Vermont.
- 38 1794 Franklin Press token. EF-40, glossy chocolate brown with a minor rim bump. Early die state with no sign of the usual break at the press. Plain edge, as usual.

- 63 1801 S-216 Blunt 1. VF-20, unusually choice glossy bluish brown surfaces suggesting a much higher grade.
- 64 1803 S-251. Small date and fraction. Choice VF-30, light brown.
- 65 1804 restrike. MS-60, Uncirculated, dull reddish brown. These were struck about 1860 outside the mint from genuine dies sold as scrap by the mint sometime after 1820. The obverse is from a worn-out, badly broken and rusted die of 1803 (S-261), altered by a graver to 1804. The reverse die is apparently that of 1820 (N-12) with the line under ONE CENT removed and certain letters in the legend strengthened by reengraving. Interesting example of 19th-century chicanery, now made respectable by over a century of time.
- 66 1812 Small date S-290. EF-40, medium to dark brown with faint traces of underlying lustre. A nice type coin.

## *Dimes*

- 137 **1798/7 Draped bust, Heraldic eagle type. VF-20**, light gray, better than average surfaces. Weak on upper right obverse as usual from these dies. A disproportionately small 8 punched high over a much larger 7. Reverse with 16 stars and long necked eagle, as on the 1796-7 quarter eagles; not impossibly a left-over quarter eagle reverse die (the two denominations are almost identical in size and reverse dies were usable on either interchangeably). Problem free early type coins such as this are becoming impossible to locate at current levels; a significant increase in price seems eventually inevitable.

## Half Dollars

199 1794 OVERTON-101. VG-8 with iridescent toning that appears to be artificial. Otherwise, fairly clean and attractive. Scarce first year of the denomination.

200 1795 O-130. Choice VF-30, obverse stronger than reverse, a few minor edge bumps. Rare, listed as R-6 by Overton.

201 1807 O-102. EF-40, lightly cleaned, but much sharpness of detail and traces of lustre. One rim bump on reverse. The variety with the 7 of the date much smaller than 180; the reverse die is broken through OF.

202 Pair of bust halves. (1) 1807 50/20 O-112. VF-20, natural blue-gray toning; (2) 1814 O-103 EF-40, dark with some obverse scratches. (Total: 2 pieces)

203 1807 Bust right, heraldic eagle. O-102. VG-8.

204 Trio of halves: (1) 1808/7 Fine-12; (2) 1819 VF-20, toned; (3) 1917 Walking AU-50. (Total: 3 pieces)

205 1811 Large 8 (as in 1812). O-104. Choice AU-55, deep gold toning over beautifully lustrous surfaces. An excellent type coin from our Terrell sale, Lot 414.

206 Type trio: (1) 1812 EF-40; (2) 1860-O EF-40; (3) 1943 MS-67, BU. (Total: 3 pieces)

### MR. RETZKY WRITES

*From his Massachusetts home Mr. Clarence Retzky wrote us a detailed letter giving his evaluation of his relationship with us—as a buyer from us and, later, as a seller. Read all about it on page 28 of our free booklet, "How to Sell Your Coins for the Best Price."*

- 208 **1813 50C over UNI O-101.** AU-50, much original mint lustre remains. Heavy clash marks on both sides, LIBERTY triple clashed along right side of shield. One of the most ludicrous blunders of the series, and rare in this condition.

- 209 **1817/3 O-101a.** EF-40 with light toning, clashed dies. A grossly underrated overdate which is rare above Fine and unobtainable in strict Mint State. By actual count of specimens coming up for sale this is considerably rarer than 1808/7, 1811/10, 1812/11, 1814/3 or even 1815/2. Apparently this die was completed by Scot as it lacks the scallop on the 13th star seen on all of Reich's dies.
- 210 **1817 O-113.** AU-50. Much lustre accents this attractive specimen.
- 211 **1818/7 Large 8.** O-101. Choice EF-45 with deep iridescent toning.
- 212 **1820/19 Curl base 2 in date.** O-102. Choice AU-55, plenty of lustre, softly struck as always. The underlying 9 can be seen practically "at arm's length." Another scarce and undervalued coin.
- 213 **Pair of bust halves:** (1) 1820 Square base 2, close date. VF-20, gray; (2) 1821 Choice VF-30. (Total: 2 pieces)
- 214 **1821 O-105.** AU-50, much lustre.
- 215 **1824 O-105.** Choice AU-55, light toning over full mint surfaces. A very attractive piece which has undoubtedly been sold many times as "Uncirculated."
- 216 **1824 O-107.** EF-40, gray toning. The entire date is triple punched (not noted in Overton). Also the piece has gone through the Castaing edge lettering machine at least three times with a resulting badly jumbled inscription. An interesting piece for the specialist.
- 217 **1824 O-109.** Repunched 4 in date, wide double profile. Choice AU-55, brilliant with full lustre. The only thing that separates this from BU is some barely detectable friction on the cheek and bust of Liberty. The reverse is fully Mint State.

*Note: During this period bust half dollars had the status of bullion coins. They were struck in large quantities for use in bank to bank transfers and for reserve purposes. Bags were being discovered in forgotten corners of bank vaults as late as the 1930s. The vast majority of these pieces have acquired too much minute friction on the bust to pass as Uncirculated, although coins of this quality are usually offered as "BU" anyway.*

- 218 **1826 O-102.** Plain 2 in date, modified portrait from a revised master die completed by William Kneass in 1825. Choice AU-55, brilliant, just a little more friction than the previous lot. Ex Terrell, Lot 443.
- 219 **1826 AU-50,** very dark, almost black.
- 220 **1826 AU-50 or so,** dull.
- 221 **1826 O-104.** Plain 2. AU-50, brilliant, most of the lustre is intact.
- 222 **1827/6 O-102.** AU-50, excellent strike, surfaces and lustre. At least equal to the average "BU" bust half sold today. The overdate is as clear as it ever comes with the curve and top of the 6 clearly visible under the 7. The reverse die was originally used in 1826 on O-114. A coin worth bidding on, as you might have to wait years for an opportunity to buy a finer one.
- 223 **1827 O-141.** Choice AU-55, gray toning, just a little dull. Tiny die defect closes C in 50C.
- 224 **1827 O-146. Curl 2 in date.** Choice AU-55. Very scarce variety usually seen well worn. This has to be at least a hundred times rarer than the usual 1827 square base 2. Blundered edge, ORALF.
- 225 **1827 Square base 2.** Choice AU-55, brilliant.
- 226 **1827 Square base 2.** AU-50, much lustre, lightest toning. A beautiful type piece.
- 227 **1827 Square base 2.** AU-50, another lovely bust half dollar.
- 228 **1828 Curl base knobless 2, large 8s in date.** O-103. Choice AU-55, full frosty lustre, just starting to tone. The large 8 1828s are scarce compared to the small 8 varieties, especially in or near Mint State.
- 229 **1828 Curl base, knobless 2, large 8s in date.** O-102. Choice AU-55, light planchet lamination on cap.
- 230 **1829/7 O-102.** AU-50, toned a deep gray and iridescent. Only the shaft of the 7 is visible under the 9, leading early cataloguers to miscall this "1829/1." Tiny die crack from 9 to curl.
- 231 **1830 Small O in date.** O-118. Choice AU-55, brilliant with nearly full mint lustre. Another piece which has been sold as "BU" in the past and undoubtedly will be in the future.
- 232 **1830 Small O.** Choice EF-45, some lustre. Blundered edge, ORLF.

- 233 **1831 MS-63, Brilliant Uncirculated,** minor obverse streaking and very weak about the obverse rim and parts of reverse motto as struck. Edge of 1832 with strong vertical reeding between words.
- 234 **Three bust halves.** (1) 1832 O-103. Choice EF-45, much lustre; (2) 1834 Large date and letters O-102. Choice EF-45, brilliant; (3) 1836 O-108 (the 1836/1336 blunder). AU-50, lightly cleaned. (Total: 3 pieces)
- 235 **1832 AU-50,** slightly defective planchet, very weak at end of bust as struck.

- 236 1833 AU-50 with much lustre, usual weak strike about the rims. Large 50C with the figures 50 larger than those of the date. Edge inscription reads FIFTY/ CENTS/ OLR/ A/ DOLLAR.
- 237 1834 Small date and letters, head of 1835. MS-60, toned Uncirculated, with an edge bump and a streaky planchet defect across lower reverse.
- 238 1834 Small date and letters, head of 1835. Choice AU-55 with brilliant mint lustre. A real beauty which is destined to be resold as "BU."
- Note: William Kneass redesigned the portrait of Liberty in mid-1834. The head is basically a copy of that on the 1831 quarter with a much longer neck and finer facial details than on earlier halves. Liberty is considerably less voluptuous than on the original Reich design; note how the bust slopes down much more at the end, exactly as on the 1831 quarter or the 1838 Kneass pattern half dollar. 1834 halves come with both styles of heads, a fact not emphasized nearly enough by Overton.*
- 239 Pair of 1834 halves, the small date is VF-20, the large date, small letters is EF-40. (Total: 2 pieces)
- 240 Type pair: (1) 1834 Small date VF-20; (2) 1859-S VG-8. (Total: 2 pieces)
- 241 1834 large date, large letters, head of 1833, O-103. Choice AU-55, surfaces are full of lustre, overlaid by a deep greenish gray toning. Scarcest type for 1834: only 3 pairs of dies compared to 5 for the large date, small letters and 10 for the small date and small letters.
- 242 1835 AU-50, toned. Much of the listed mintage of 5,352,006 for 1835, perhaps more than half, was undoubtedly dated 1834 or earlier.
- 243 1838 Reeded edge. Choice AU-55, toned with a few minor obverse abrasions. A very popular type coin issued only in 1838 and 1839.
- 244 1838 EF-40, deep blue-gray toning. One nick on reverse rim.
- 245 1839 Bust. Choice EF-45, much mint lustre.
- 246 1839 Bust. EF-40, some lustre.
- 247 Half dollar trio: (1) 1839 with drapery. Choice AU-55, brilliant, many light contact marks; (2) 1810 AU-50, cleaned, unusually sharp strike for this date; (3) 1828 EF-40, cleaned with rim damage. (Total: 3 pieces)
- 248 Group of seated halves: (1) 1839 drapery VG-8; (2) 1846-O Good-4; (3) 1847-O Fine-12, many marks; (4) 1848 Fine-12, polished; (5) 1857-O Fine-12, marks. (Total: 5 pieces)
- 249 1840 Reverse of 1839 with small letters. Choice AU-55, fully prooflike even within the shield stripes.
- 250 1844 Choice EF-45.
- 251 1845-O Choice EF-45, deep blue and gray toning. The "no drapery" variety, the result of die polishing. Interesting light parallel die striations across lower part of seated figure.
- 252 1847 Choice EF-45.
- 253 1849 AU-50. Doubled 1 in date; first 1 punched too low (and upside down?) then corrected. No signs of doubling on 849. This does not match either of the 1849 doubled dates listed by Taxay.
- 254 1850 AU-50, a nice piece with much lustre and reasonably choice surfaces. Scarce date that is surprisingly hard to find in top grade.
- 255 1850-O AU-50, harshly cleaned leaving hairlines on the surface.

- 256 1852-O Choice Extremely Fine-45 or better. Traces of lustre. It would be very difficult to find a specimen much sharper than this one.
- 257 Pair of Arrow types. 1853-O and 1855-O. Both are VG-8 or better with dark gray toning. (Total: 2 pieces)
- 258 1855-O AU-50.
- 259 Quartet of halves: (1) 1860 VG-8; (2) 1862 Good-4; (3) 1872-CC Good-4; (4) 1873 VG-8. (Total: 4 pieces)
- 260 Group of halves. Includes 1860-O AU-50, cleaned; 1897 EF-40, cleaned. Plus the following Walkers all in AU-50: 1933-S, 1934-S, 1936-S (2 pieces), 1942-S, 1943. (Total: 8 pieces)

- 261 1865 Proof-63, with a strange matte-like surface on reverse. Light obverse hairlines.
- 262 1870-CC Good-4. These circulated well into the Roaring Twenties.

(See Color Photo)

- 263 1871 Proof-65, brilliant, just starting to tone.
- 264 1880 EF-40, pleasing light golden gray. This was a former Proof which escaped into circulation for a few years. Traces of Proof surfaces are visible in the protected areas of the coin. Will probably realize well above catalogue value of \$225.00.
- 265 1891 Proof-60, the mirror surfaces are intact.

- 266 1892 Barber. MS-63, Brilliant Uncirculated, excellent surfaces.
- 267 1899 AU-50, full lustre in fields.
- 268 1900 EF-40, dark gray.
- 269 1903-S Choice EF-45.
- 270 1907-O AU-50, some lustre, light iridescent gray toning.

271 1910 Choice AU-55, tiny lamination defect across obverse.

272 1911 Choice EF-45, lustrous and nice for the grade.

273 **1916 Walking Liberty. MS-67, Uncirculated**, beautifully toned. Deep, sculpted fields, extra wide borders, and a splendid sharp strike not matched by non-Proofs of any of the later dates of this series. The perfect coin to illustrate this type. The *Guidebook* value of \$300.00 will be left far behind!

**Superb MS-65 1886-O Morgan**

- 364 **1886-O MS-65, Brilliant Uncirculated. Full strike.** Rare in all states of Uncirculated condition, but especially rare as superb as this specimen. Expect spirited bidding to commence on this and the next 1886-O.

**Second Delightful 1886-O Dollar**

- 365 **1886-O MS-65, Brilliant Uncirculated.** Nearly on a par with the preceding 1886-O. (The strike on this being just the slightest bit less sharp). Surfaces and lustre are exceptional.

*Note: Most 1886-O dollars seen on the market that are listed as Uncirculated are invariably "sliders." For some strange reason 1886-O is not known in quantity in full Uncirculated condition (as are most other dates in the Morgan series). The opportunity to bid on one nice MS-65, let alone two as we have here, is almost unprecedented!*

- 536 1877-S MS-60, Brilliant Uncirculated.
- 537 1877-S Box Trade dollar. Fine-12. Most of these so-called "opium" dollars were made for the World's Columbian Exposition in 1892 and 1893. Actually they were meant to house a loved one's photograph.

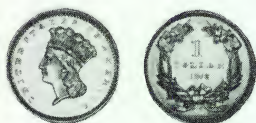

- 538 1877-S Box Trade dollar. VG-8. As last, but on this specimen we are at a loss to find the pressure point which opens the lid!!

- 551 1927 MS-63, Brilliant Uncirculated.

## Gold Dollars

- 539 1849 Open wreath. EF-40.  
540 1852 MS-60, Brilliant Uncirculated.  
541 1855 Type 2. EF-40. Some obverse pin scratches.

- 544 1862 MS-63, Brilliant Uncirculated.  
545 1874 MS-63, Brilliant Uncirculated. The word LIBERTY is fully readable (most unusual as 1874 nearly always comes with the word obliterated by die refinishing).

## Quarter Eagles

### Delightful 1838 Kneass \$2½

(See Color Photo)

- 546 **1838 MS-63, Brilliant Uncirculated.** William Kneass, mint engraver, redesigned the quarter eagles and half eagles in 1834. His attractive designs were, for some reason, short-lived—being replaced by Gobrecht's modification in 1839. The present 1838 has superb strike and lustre. It should fit nicely in most any high quality gold collection.  
547 **1870-S** One of the elusive dates in the late-1860/early-1870 run of quarter eagles. Lustrous AU-50.  
548 Three quarter eagles: (1) 1905 MS-60, BU; (2) 1927 Choice AU-55; (3) 1928 MS-60, BU. (Total: 3 pieces)

550 1913 MS-63, Brilliant Uncirculated.

## Three-Dollar Gold Piece

- 552 1857 EF-40.

## Four-Dollar "Stella"

### Attractive Proof-50 1879 Flowing Hair \$4

(See Color Photo)

- 553 **1879 Flowing hair \$4 gold "stella." Proof-50** with just the lightest signs of rubbing. The "stella" is America's *premier* gold coin—and a strange denomination at that. The basis behind this odd \$4 pattern was an attempt at matching this coin with others of similar size issued by other countries.

## Half Eagles

### Attractive Mint State 1835 \$5

- 554 **1835 MS-60, Brilliant Uncirculated.** William Kneass's short-lived type. Very elusive in the higher grades.

**Rare AU 1853-C \$5 Gold**

- 555 **1853-C Choice AU-55.** Charlotte Mint gold (as well as Dahlonega gold) has been in the doldrums since 1975. Most coins go in popularity cycles. It is only fitting then that just recently "C" and "D" gold should begin to dry up. Demand has quietly increased and we find it more and more difficult to pry a nice piece loose. Here is wonderful opportunity to "salt away" a high grade example of this Southern mint's scarce half eagle.

**Dazzling Proof 1893 \$10 Gold**

(See Color Photo)

- 570 **1893 Proof-63, brilliant.** Dazzling deep mirror fields offset the brightest frosted devices we can remember. This delightful combination gives the coin an attractive two-tone effect. There is something special about Proof gold coins—something that makes a collector's eyes open wide just viewing one!

# *United States Paper Money*

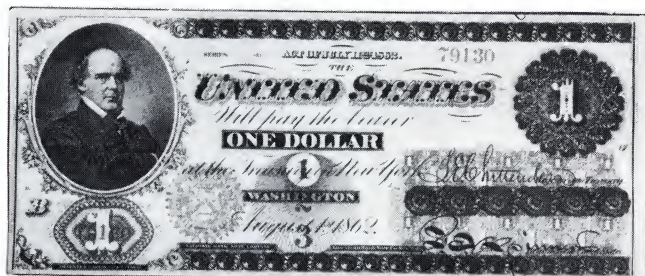

## *Large Size Notes Legal Tender Issues*

*Legal Tender paper money also goes by the name U.S. Notes. This form of instrument arose during the stress of the Civil War. The North desperately needed funds to wage its portion of that conflict. Taxing and bond issuance brought in limited funds. However, as with most countries at war, something else was needed. "Legal Tender" was the answer—a government sponsored printing of fiat money. No backing (such as gold or silver or bonds) was given the issue. Rather, the laws specifically called for redemption in hard monies after the end of hostilities.*

*Of course, politicians being politicians, this redemption provision was conveniently "overlooked" when the time came to face up to reality. Thus, even as this is written in late 1979, the Federal government is required by LAW to maintain something over \$350 million worth of the notes. These are the now-seldom-seen red seal \$1, \$2, \$5 and \$100 notes of 1928, 1963 and 1966 series. All other paper monies of the country are Federal Reserve Notes.*

*Legal Tender issues of nearly all types are quite beautiful. Designs such as the "rainbow" series of 1869 hearken back to a time when sterilized designs weren't even thought of. The "woodchopper" \$5 notes and the bison \$10 bills need no explanation—their extreme popularity is well known. We begin this section with one of the early Civil War emergency notes—a \$1 Legal Tender note of 1862.*

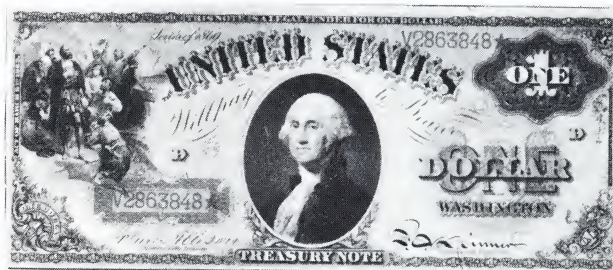

### **Choice New Specimen of F-17 \$1**

### **653 F-17 \$1 1862. Choice Crisp New. (\$1000-\$1300)**

*No. 79130. Series 141. Slightly over 28 million 1862 \$1 notes were printed. Many were subsequently destroyed. High quality notes such as this are seldom encountered. One slightly rounded corner. Excellent centering (rare, as these were printed quite close together on the sheet and thus come trimmed with small margins). Bright color and white paper provides additional appeal.*

### **Colorful 1869 "Rainbow" \$1**

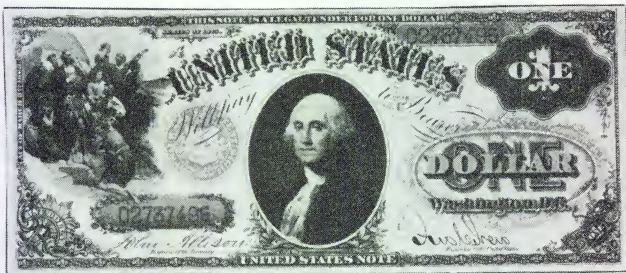

### **654 F-18 \$1 1869. The rainbow series. Choice Crisp New. Wide top margin. The other three about equal. (\$1700-\$2000)**

*No. V2863848. Position D. Paper money of the late 1860s provides the collector with many different varieties. Counterfeiting had been rife throughout the Civil War and authorities had to work hard to keep one jump ahead of the alterers! 1869 saw the culmination of the Treasury's anti-counterfeiting techniques in the issuance of what has come to be known as the "rainbow" series Legal Tender notes. Special rag paper had been used before. To this was added imbedded blue silk fibers in a wide band to the left of center. The treasury seal was enlarged and made much more ornate. A tinting of green along the top and blue through the silk fiber band put a final touch to this delightful design. \$1, \$2, \$5 and \$10 "rainbow" notes were issued. Higher denominations were similar, except they lacked the green tinting along the top.*

*Whether this stopped the counterfeiters is not known for certain. What is known is the number of \$1 bills printed for the 1869 series—42,456,812. Many have been destroyed or lost, of course. The type was short-lived, too. Beginning in 1874, the note lost its "rainbow" effect. Be sure to check the other "rainbow" denominations offered in this section!*

### Rare Series C 1875 \$1 Note

- 655 **F-23 \$1 1875 Series C.** Design similar to the preceding. **Gem Crisp New.** A beautiful example of this important rarity. (\$2200-\$2800)

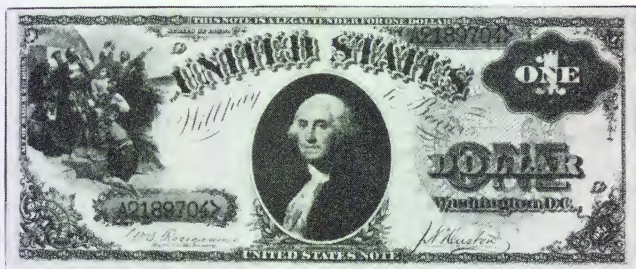

*No. D273749. Position A. Balanced margins all around. Sharp corners. Bright colors. An exceptionally nice specimen!*

- 656 **F-28 \$1 1880.** Large brown seal. Red serial numbers. A striking note! Excellent quality, too. **Gem Crisp New.** (\$700-\$850)

*No. Z4908278. Position B. Top and left margins a bit wider than other two. Sharp corners. Bright, bright note.*

- 657 **F-30 \$1 1880.** As last. Crisp New, except for a corner fold about one inch in from the top right corner. Would grade Choice otherwise. (\$150-\$200)

### Handsome F-31 1880 Note

- 658 **F-31 \$1 1880.** Large light red seal. Blue serial numbers. **Gem Crisp New. Superb.** (\$2000-\$2400)

*No. A2189704. Position D. Of all 1880 varieties, this and the following lot represent samples of two of the rarest. F-31 is encountered from time to time in worn condition, but is almost unheard of this nice. Paper is bright as the day it was made. Colors are perfect. The margins are wide all around. Corners sharp. We doubt if you could find the equal to this note without years of searching.*

### Impressive F-33 \$1 1880

- 659 **F-33 \$1 1880.** Type having large brown seal and blue serial numbers. **Gem Crisp New.** (\$2000-\$2400)

*No. A2798338. Position B. The Bureau of Engraving and Printing kept switching seal colors, sizes and serial number colors around from 1880 to 1917. Whether this was done to make a better "product" or just by some whim is not known for certain. Collectors today know that the brown seal/blue serial numbers combination was printed in very limited numbers. The present note has excellent centering, sharp corners and white paper—everything the paper money connoisseur insists on in a quality piece. Expect competition on this one—we haven't seen another as nice in a long while.*

- 660 **F-37 \$1 1917.** Gem Crisp New. (\$190-\$225)

- 661 **F-37a \$1 1917.** Gem Crisp New. (\$750-\$900)

*No. H13592019A. Position C. This note is identical to F-37, except for one very important detail. Somebody goofed! Instead of having Elliot's name above "Treasurer of the United States" and Burke above "Register of the Treasury," the engraver accidentally reversed the names on one plate! One billion 1917-series notes were printed. Only a tiny, tiny percentage of this number carried the erroneous signature reversal! Today only a half dozen or so F-37a's appear every year.*

- 662 **F-39 \$1 1917.** Gem Crisp New. (\$200-\$230)

- 663 **F-39 \$1 1917.** Star replacement note. Gem Crisp New. (\$500-\$600)

*No. \*13602070B. Position B.*

- 664 **F-40 \$1 1923.** Red seal and serial numbers. Gem Crisp New. (\$350-\$425)

### High Grade "Rainbow" \$2

- 665 **F-42 \$2 1869.** The rainbow series. **Choice Crisp New.** (\$3200-\$3800)

*No. U6797311. Position C. Some rounding of the corners (as often seen on early bills). Full margins. Top and bottom uneven as the sheet was slightly cantered when cut.*

- 666 **F-56 \$2 1880.** Small scalloped red seal. Blue serial numbers. **Gem Crisp New.** (\$700-\$825)

*No. A3572061. Position A. Needle sharp corners and exceptional margins.*

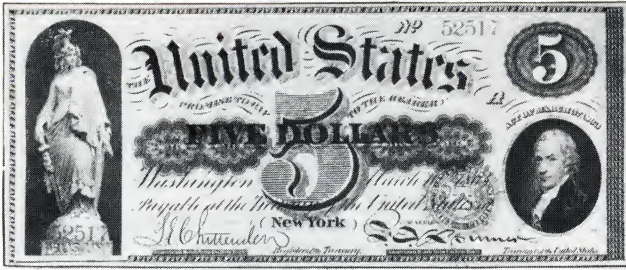

- 667 **F-60 \$2 1917.** Final design type for the large size \$2 Legal Tender. A lovely Gem Crisp New specimen. (\$350-\$400)

- 668 **F-60 \$2 1917.** Crisp New, tiny corner crease. Would be a gem without this. (\$140-\$175)

### NORTH CAROLINA TO CALIFORNIA! WHY?

*Why did one of North Carolina's most prominent numismatist select Bowers and Ruddy Galleries in California to sell his coins? The answer appears on page 25 of a booklet we invite you to send for: "How to Sell Your Coins for the Best Price." It's free for the asking.*

- 669 **F-63 \$5 1863.** Civil War issue \$5. One of the most attractive of the early notes. **Choice Crisp New.** (\$1000-\$1250)

*No. 52517. Position A. Two rounded corners and a faint counting wrinkle keep us from being able to grade this Gem. The margins are full—very unusual on 1862-1863 "green-backs."*

### Splendid "Rainbow" \$5 Legal Tender

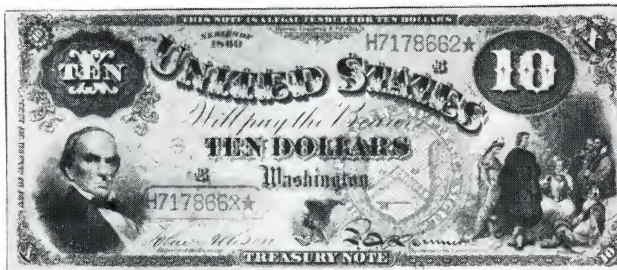

- 670 **F-64 \$5 1869.** The rainbow series. **Gem Crisp New.** (\$1700-\$1900)

*No. K3919680. Position D. Fat margins all around (nearest along bottom margin at left. Splendid bright ink over white paper. For the "fussiest" collector.*

*This is the first appearance of the very attractive "wood-chopper" note—so named because of the rustic settler, axe in hand, who has just felled a tree. The family dog stares off to the right. He has probably just seen a raccoon or other forest denizen.*

- 671 **F-68 \$5 1875.** Woodchopper design. **Gem Crisp New.** (\$650-\$800)
- 672 **F-74 \$5 1880.** Woodchopper note. Large, plain red seal. Blue serial numbers. **Crisp New** with a small pinhole. (\$200-\$300)
- 673 **F-88 \$5 1907.** Last design featuring the woodchopper and family. Excellent for a type set. **Choice Crisp New.** Three wide margins. Top one a bit too close for us to call the note **Gem.** (\$325-\$375)
- 674 **F-91 \$5 1907.** Two pieces grading **Very Good.** (\$40-\$50) (Total: 2 pieces)

### The "Rainbow"/Jackass \$10 1869

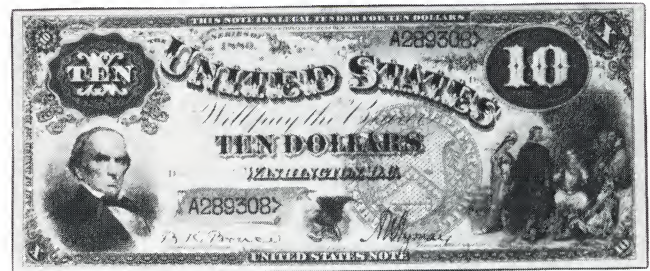

- 675 **F-96 \$10 1869.** The rainbow series. **Choice Crisp New.** (\$1600-\$1800)

*No. H7178662. Position B. Margins near at top and right. Wide margins left and bottom.*

*F-96 carries two numismatic names. First is the "rainbow" designation. The present note displays its red, blue, green and black in full brilliance. The second nick-name, "jackass note" arises from a more obscure observation. A long-ago student of the strange discipline of synergetics (paper money equivalent of numismatics) took a myopic look at the small obverse eagle. He discovered a remarkable likeness to that perennially stubborn beast, the jackass, when he turned the note upside down. So, today, paper money collectors can quickly receive a funny look from their friends by pointing to this highly interesting coincidence!*

### 1880 Red Seal \$10 Legal Tender

- 676 **F-103 \$10 1880.** Large, plain red seal. Blue serial numbers. **Jackass** eagle design. **Gem Crisp New.** (\$1500-\$1700)

*No. A289308. Position D. Perfectly centered. Bright. Pristine. An exquisite example of this elusive variety.*

- 677 **F-113 \$10 1880.** Small scalloped red seal. Blue serial numbers. **Gem Crisp New.** (\$1500-\$1700)

*No. A30831439. Position C.*

- 678 **F-116 \$10 1901.** Bison note. **Extremely Fine.** (\$350-\$400)
- 679 **F-118 \$10 1901.** Bison note. **Extremely Fine.** (\$350-\$400)
- 680 **F-119 \$10 1901.** Bison note. **Extremely Fine.** (\$350-\$400)

### Superb 1923 Jackson \$10

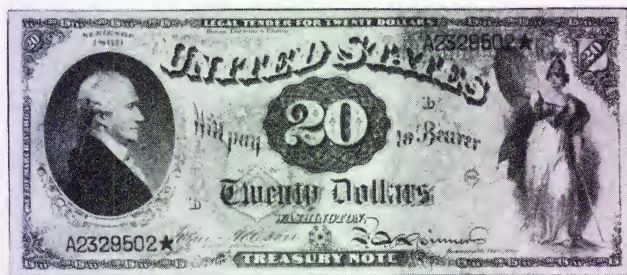

- 681 **F-123 \$10 1923.** **Gem Crisp New. Superb.** (\$5000+)

*No. A688303B. Position C. Only 696,000 Jackson tens were issued. The few seen today are most often in well worn grades. The present specimen is definitely one of the nicest we have ever seen! Our estimate is right in line with current market value, but if you truly desire this very scarce bill, don't hesitate to bid higher. You will be well rewarded in years to come when you again place the note on the market.*

### Rare and Desirable 1869 \$20

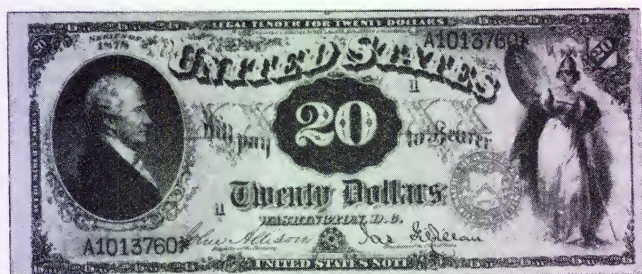

- 682 F-127 \$20 1869. The *rainbow* series, but without the same color configuration of the lower-denomination bills. This one has a beautiful blending of red, white and blue (plus the usual black designs)—sort of a patriotic motif. **Choice Crisp New.** (\$6000-\$7200)

No. A2329502. Position B. Pleasing wide margins all around. Sharp corners. Bright colors. And most importantly, **RARE** in this condition.

- 683 F-128 \$20 1875. Similar to last, but with double red "XX" to each side of center. AU. (\$750-\$900)

No. A1104251. Position C. Only a central fold away from **Choice New.** Bright. Perfectly centered.

### Attractive Choice New F-129

- 684 F-129 \$20 1878. **Choice Crisp New.** (\$2500-\$3000)

No. A1013760. Position D.

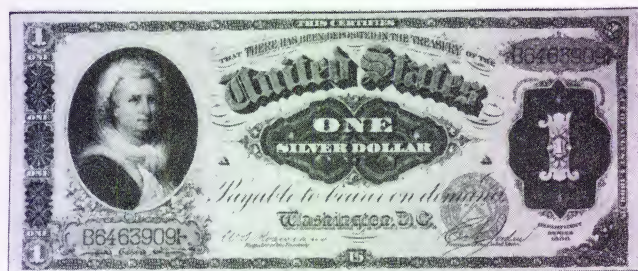

- 685 F-129 \$20 1878. Similar to preceding, except new series date. AU. (\$750-\$900)

No. A1013988. Position D. As with the AU F-128, this too has only the faintest central crease. Its centering is excellent. So too is the color preservation. Many would miss the central crease and call this a **Gem**!

- 686 F-152 \$50 1874. VG, repaired at right margin. (\$500-\$575)

## Silver Certificates

### Nice Run of Martha Washington \$1 Notes

- 687 F-215 \$1 1886. Small, plain red seal. Blue serial numbers. **Gem Crisp New.** (\$1650-\$1850)

No. B6463909. Position A. Bright. Full margins.

- 688 F-216 \$1 1886. As last, except for differing signatures. **Choice Crisp New.** (\$1350-\$1500)

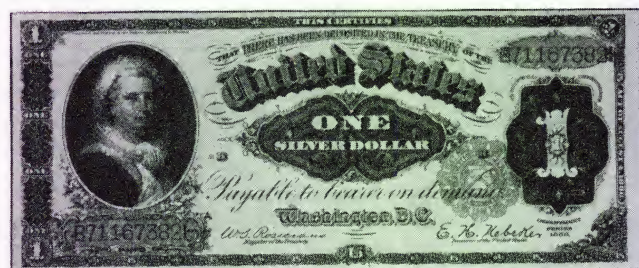

No. B20601598. Position B. Bottom margin a bit closer than would warrant the grade **Gem**.

- 689 F-217 \$1 1886. Large, spiked red seal. Blue serial numbers. **Choice Crisp New.** (\$1350-\$1500)

No. B31287892. Position D. Top margin a bit narrow. Two slightly rounded corners. Superb otherwise. One you should consider for your type set.

- 690 F-218 \$1 1886. As last, except for signature change. **Gem Crisp New.** (\$1650-\$1850)

No. B45183802. Position B. Delightful in every respect.

- 691 F-221 \$1 1886. A scarce variety. Small, scalloped red seal. Blue serial numbers. **Gem Crisp New.** (\$2000-\$2400)

No. B71167382. Position B. We see very few F-221s offered—in any condition, let alone in **Gem New**! If you have been searching for a prime example of this scarce Martha note, we suggest you place a bid. It is doubtful if a finer one will come along!

- 692 F-222 \$1 1891. New reverse, this being less ornate than the 1886 reverses. **Choice Crisp New.** (\$800-\$1000)

No. E5299914. Position B.

- 693 F-222 \$1 1891. Very Fine. (\$175-\$200)

- 694 F-223 \$1 1891. Small, scalloped red seal. Blue serial numbers. **Crisp New** (very close to **Choice**, in fact). (\$700-\$800)

No. E40276399. Position C. Three wide margins and one narrow.

- 695 F-223 \$1 1891. AU. (\$350-\$425)

No. E34186217. Position A. One central crease. The note was possibly washed at one time, but still retains full crispness.

## Handsome 1896 Educational \$1

- 696 **F-224 \$1 1896.** The *Educational* series, featuring *History Instructing Youth*. George and Martha adorn the reverse surrounded by all the ornateness late 19th-century art could come

up with. **Gem Crisp New.** The ultimate grade for a note! (\$1700-\$2000)

*No. 1099692. Position D. Sharp as the day it was made.*

- 697 **F-224 \$1 1896.** As last, the *Educational* series. About Uncirculated. (\$300-\$375)

- 698 **F-224 \$1 1896.** As last. EF. (\$250-\$300)

- 699 **F-224 \$1 1896.** As last. Very Fine. (\$100-\$130)

- 700 **F-225 \$1 1896.** Similar to F-224, except for a change in signatures. Another attractive type note: **Choice Crisp New.** (\$1350-\$1550)

*No. 40772300. Position D.*

- 701 **F-226 \$1 1899.** Gem Crisp New. (\$275-\$350)

- 702 **F-230 \$1 1899.** Serial number H44H. Gem Crisp New. (\$220-\$260)

- 703 **F-232 \$1 1899.** Serial number N3N. Gem Crisp New. (\$375-\$450)

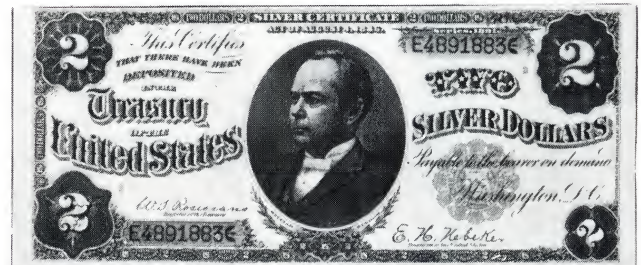

- 704 **F-237 \$1 1923.** Three pieces, all grading AU. (Total: 3 pieces) (\$30-\$50)

*All \$2 silver certificates are scarce. This was never a popular denomination (it still is shunned today), so few were made and few survived. A Choice New note such as this will always receive attention.*

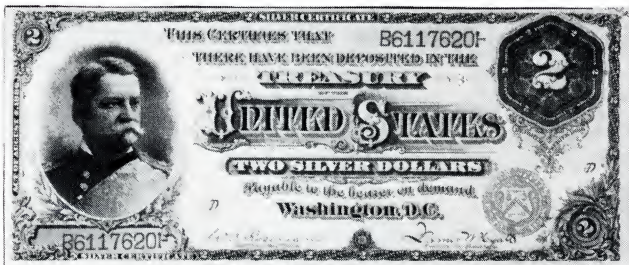

- 706 **F-242 \$2 1886.** As last, except for seal change (now a large, spiked red one). Crisp New. Printing on reverse a bit close to the top margin, although the obverse is well centered. (\$900-\$1050)

*No. B13055104. Position D. A tiny pinhole is visible in the center. Without this the note is Choice New.*

## Unusually Fine William Windom \$2

## Scarce Hancock Deuce

- 705 **F-241 \$2 1886.** Portrait of General Winfield Scott Hancock. **Choice Crisp New.** (\$1500-\$1800)

*No. B6117620. Position D. Small, plain red seal. Blue serial numbers. Hancock died in 1886. To commemorate his stature among American generals, this two-dollar bill was chosen to carry his portrait.*

- 707 **F-245 \$2 1891.** Portrait of William Windom. **Gem Crisp New.** (\$4000+)

*No. E4891883. Position C. The second "commemorative" two-dollar silver certificate. William Windom, who died in 1891, was commemorated with this note. Holding office as United States Senator from Minnesota, as well as Secretary of the Treasury, Windom was known at the time as a "hard money" advocate. This meant he preferred a gold standard. His major opponent at this time, William Jennings Bryan, advocated "easy money" (silver backing and fiat paper issues)—an attempt to help the suffering farmers. It is ironic, then, that when Windom passed on, he was enshrined on a SILVER certificate. He probably gave a sigh of chagrin and rolled over in his grave!*

## USE THE INDEX

*See the Index to the Sale for a listing of the many interesting coins in this catalogue.*

## Two-Dollar Educational Note

- 708 F-247 \$2 1896. *Science Presenting Steam and Electricity to Commerce and Manufacturing* is the theme of the \$2 Educational note. The present specimen is unsurpassable: **Gem Crisp New.** (\$4750-\$5250)

No. 251. Position C. Exceptional margins. Bright color. Low serial number. All outstanding qualities one looks for.

How could such a lovely series of notes have been replaced three years after it came into being? Interestingly, the story is

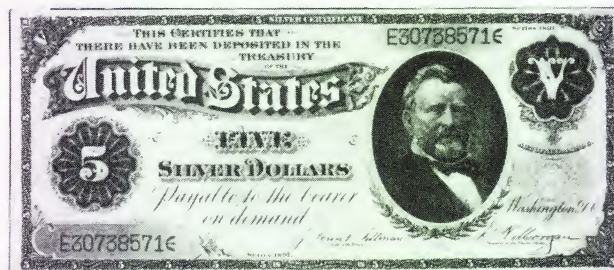

explained by the extreme modesty of people in those times. It seems the \$5 Educational note displayed a goodly portion of "Electricity's" breast. This so offended the powerful Anthony Comstock (and his backers) that he had the Congress discontinue the offending design! The "reason" given at the time was ease of counterfeiting. Anthony Comstock and his cronies played a role later in numismatic meddling. 1917 Type I standing Liberty quarters were hastily altered in mid-year—again because of an offending breast!

- 709 F-247 \$2 1896. *Educational* series. Extremely Fine. (\$375-\$450)

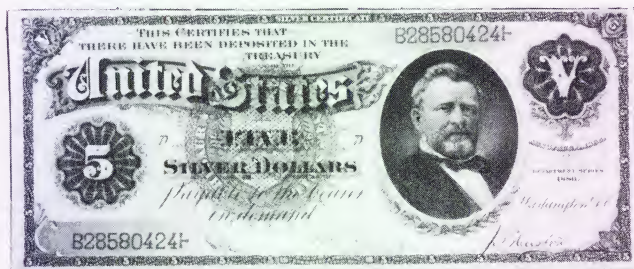

- 710 F-256 \$2 1899. Low serial number N111. Gem Crisp New. (\$800-\$900)

## Rarely Seen 1891 \$5 Silver Certificate

## Popular Grant Silver Dollar Back \$5

- 713 F-267 \$5 1891. Portrait of Grant as preceding. New, plainer reverse. Much rarer than generally supposed in high grades: **Choice Crisp New.** (\$2600-\$3000)

No. E30738571. Position C. Excellent centering. Only the lightest counting smudge in the upper right corner keeps this from the Gem category.

- 712 F-263 \$5 1886. Numismatic reverse featuring five overlapping 1886 Morgan dollars. **Choice Crisp New.** One tiny pinhole is noticeable. Without this we would call the note a superb Gem! (\$3000+)

No. B28580424. Position D.

## National Bank Notes By State

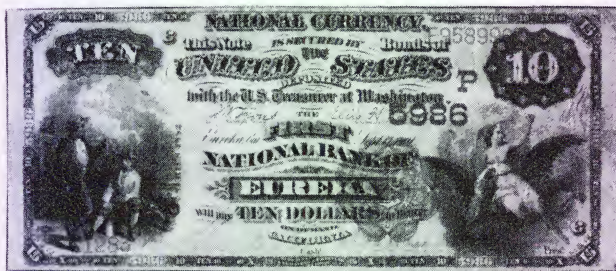

Some rare and outstanding Nationals await you in this section. One consignor tried to assemble a state set of First Charter ones. To his credit, he concentrated on the rarest states or highest grades first. So, although incomplete, there are such outstanding notes as: Dakota Territory, a Crisp New Pueblo, Colorado bill and a serial number 4 Utah note signed by Brigham Young! Another exciting lot is the Tombstone, Arizona \$20 Third Charter. A rare state plus a grand name combine to give this one a special appeal.

### Tombstone, Arizona

- 763 **Arizona. F-654 \$20 1902.** Third charter, third issue (without dates on the reverse). **The First National Bank of Tombstone, Arizona.** Charter number 6439. Regional letter P. **Very Fine.** According to records, the total number of notes outstanding from this bank at its close in 1926 was \$20,000 face! A small amount—most of which has long since been destroyed or lost.

No. X436854E. Position B. Well centered and unsoiled. The \$20 is, of course, the rarest for this bank.

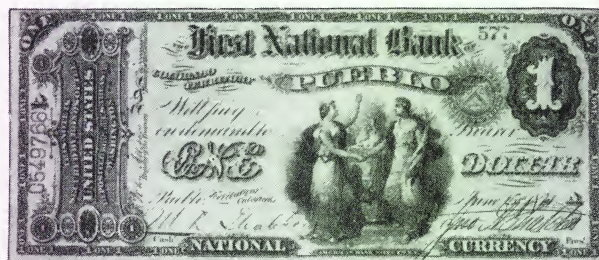

- 764 **California. F-490 \$10 1882.** Second charter, first issue (brown back). **The First National Bank of Eureka, California.** Charter number 5986. Regional letter P. **Very Good.**

No. E958996E. Position C. "Eureka" coincidentally California's state motto is Eureka (Greek for "I Have Found It"). At the time of the bank's closing in January 1931, only \$36,917½ in large size notes remained outstanding.

### ALL OVER THE WORLD

When you offer your coins in a Bowers and Ruddy Galleries sale, bidders from all over the world will eagerly compete for your material. Our auctions not only are famous in America, they make front-page news in Britain, France, Italy, Japan, Germany, and other centers of numismatic activity all around the globe.

### Exceedingly Rare Pueblo, Colorado Note Crisp New Condition

- 765 **F-382 \$1 Original series.** First charter designs. **The First National Bank of Pueblo, Colorado Territory.** Charter number 1833. **Crisp New.** Exceedingly rare and of extreme importance in this condition.

No. 577. Position A. Three wide margins and one narrow. Bright color. Tiny corner crease lower left. According to records, The First National Bank was chartered June 15, 1871. Only 4,500 \$1 bills were made from this bank. Of course, Colorado notes are all rare and in demand. To find one as nice as this, and a FIRST CHARTER TERRITORIAL as well, is worth noting. (Colorado became a state on August 1, 1876. Notes printed after this date denote the new status.)

As of 1935, slightly over thirty thousand dollars worth of large size notes remained outstanding. Most of these had to be second and third charter issues.

Although Pueblo did not have gold and silver mines in the heyday of the Colorado mining boom, the city did process much of the ores to come from those mines.

- 766 **Connecticut. F-380 \$1 First charter.** Original series. **The First National Bank of Stamford, Connecticut.** Charter number 4 (number does not appear on note). This is the fourth National Bank to be chartered! **Crisp New.** Several pinholes. Without these we would grade the note a full Choice Crisp New.

No. 992. Position C. Three wide margins, one narrow. Colors slightly aged, but overall exceptional quality.

### 30% MORE THAN HE EXPECTED!

One of our consignors recently wrote to us to say that his coins sold for 30% more than he expected to receive—after his study of the coin market! Armand Champa, one of America's most prominent numismatists, wrote to us to say that his coins sold for DOUBLE the highest cash offer he was able to get for his coins by having dealers come to make bids on his collection. And, our files are full of many other such experiences. Recently, a piece which the consignor expected to get about \$15,000 for fetched \$50,000! We could think of even more spectacular instances, but you get the idea!

Thinking of selling? There is one right answer: An auction sale by Bowers and Ruddy Galleries.

**Very Rare Oklahoma Note**

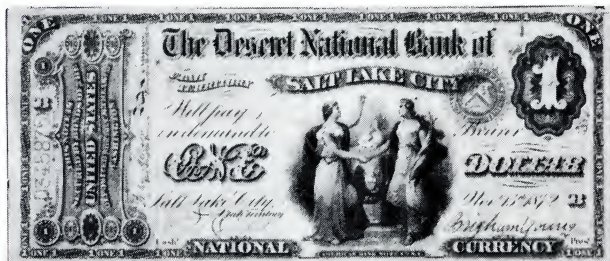

- 783 **Oklahoma. F-627 \$10 1902.** Third charter, third issue. **The Shattuck National Bank of Shattuck, Oklahoma.** Charter number 9987. Very rare! Records show only \$350 worth of large size notes outstanding as of 1935. **Extremely Fine** condition.

Even as late as 1910 (the last year records are available), only \$1,258 worth of notes remained outstanding. It can be surmised that most of these were either lost or fell victim to fires, etc. To find one as nice as this is noteworthy!*

**Utah Note Signed by Brigham Young**

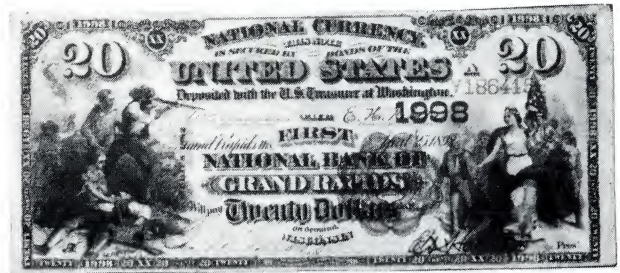

- 785 **Utah. F-382 \$1 First charter.** Original series. **The Deseret National Bank of Salt Lake City, Utah.** Charter number (not on note) 2059. **Serial number 4.** Signed by none other than **Brigham Young.** The note grades a pleasing **Fine** condition. The only defect, and it is barely worth noting, is a tiny piece out of the top margin (not touching the design) at right. A wonderfully historic note, worthy of the finest collection. Expect a bidding war.

*Position B.*

- 786 **Wisconsin. F-384 \$1 1875.** First charter. The LaCrosse National Bank. Charter number 2344. Crisp AU condition. Four excellent margins. Superb centering. Only the lightest fold away from Crisp New grade.

- 810 Similar equal arm pan balance in a black oval box, same size as above, and dating from the same period. Includes four coin weights: (1) sovereign; (2) d5/g8 (English guinea); (3) a second flat guinea weight; (4) a flat s13/d6 weight. Good condition, velvet lining gone, light corrosion to box.
- 811 Same type and size scale in the same black oval box. Two coin weights in separate compartment, also apparently dating from the 1790s. three additional flat weights added later: (1) s10/d6 with a beaded border; (2) 21 shillings (equal to one guinea); (3) half sovereign. Head of Queen Victoria with ROYAL MINT above and date 1845 below. Fine condition overall.
- 812 England, 1780s. Equal arm pan balance, same type and size as preceding. In a handsome maple box (5¼x2½x1 in.) with two separate compartments on either side for coin weights. Weights include a set of 6 square foils from 2 to 6 grains, and a set of 6 round weights with ornamented borders from s5/d3 to s36 with equivalents in pennyweights and grains. On lid of box is pasted a paper label on which, in neat 18th-century script, is given weight tolerances for guineas and half-guineas before George III, guineas, half-guineas, and quarter-guineas of George III, and 1772 guineas and half-guineas. **Very Fine, a superb item!**
- 813 Sovereign balance, single arm lever type 3½ in. long. For sovereigns and half-sovereigns. Comes in a 19th-century cardboard box with label that is only partly decipherable. A quick and convenient device to catch light weight counterfeits. The balance is Fine or better; the box Fair with some decomposition and wear around the corners.
- 814 Sovereign balance, same type and size, but stamped B. CAT-TLE on lever arm. Good condition, no box.
- 815 Another, same type and size, no stamp on lever arm. Good, hinge a little loose.
- 816 Another, same type, stamped HARRISON on lever, and BIRM<sup>M</sup> on base. Fine.
- 817 England, late 18th-century guinea scale, spring into position type. Brass scale is attached to mahogany box (5¼x1x½ in.). Scale has movable "turn" and a balance with movable poise. Label attached to lining of box in 18th-century printing gives instructions for use and claims, "These balances are as accurate as the best scales, more expeditious, portable, and not liable to be out of order." MOUNTFORD printed vertically on label near hinge. **Very Fine condition**, snap on box is worn.
- 818 Similar, but for sovereigns. Manufactured by Stephen Houghton and Son, Ornskirk, successors to A. Wilkinson. Label on in-
- side of box and another on lid gives instructions on how to use the balance, extols the virtues of the balance, and gives the current legal weights of sovereigns and half-sovereigns. Same snap type lid. Very Fine.
- 819 Similar type for guineas. "Made by H. Bell, Lancashire" on label. Two weights : d2/g16 and d5/g8 (English guinea = 21 shillings) in custom compartments. Very Fine with the label clear and bold.
- 820 Similar spring into position type balance, no weights or label. Same snap type mahogany box. Fine, some splitting on the box.
- 821 Similar type balance. Label inside top reads: "Manufactured by R. Brown and Co., Prescott, Lancashire, late H. Bell and Co. The turn at the end for a Sovereign; to the centre for a Half-Sovereign. Before the box be shut, turn up the scale." Probably a mid-19th-century item. Very Fine.
- 822 **American gold scale, 19th Century.** Equal balance beam 5 in. long, two brass pans 2 in. in diameter attached with green cords. Set of 6 apothecary weights in a separate lidded compartment along with 6 square foil weights from ½ to 6 grains. Comes in a wood box covered with green leather, **embossed at top with an American eagle as used on post-1840 U.S. gold coins**, purple lining inside box. This type of scale was very popular in the California gold fields. Fine overall and a prize item for the collector of American gold coins, especially Territorials.
- 823 American gold scale, 19th century. Double pan type with 4 in. beam and 1½ in. pans connected by green cords. Six weights of assorted types including 2 square foils in a separate compartment. Housed in a purple-lined box measuring 5½x3x1 in. with American eagle embossed on lid. Good condition with moderate corrosion on the brass pans.
- 824 19th-century European gold scale, small double pan with a 3 in. beam and 1¼ in. brass pans connected by fine green cords. Comes in a red heart-shaped box with green velvet lining. Separate slots for 6 coin weights but only 4 are present: ½ and 1 severin (= sovereign?) and 1 and 2 ducats. There is a separate lidded compartment for smaller (grain?) weights but this is empty. The scale and weights are Fine or better, the compartment is Good with the hook fastener broken off.

*Pictured above: Lot 830*

- 825 France, late 18th-century hand held double pan balance. 4½ in. beam with 1½ in. diameter brass pans connected by fine green cord. Cupped tray weights in separate recess as well as a separate compartment with assorted square foil grain weights going up to 24 grains. Housed in an oval shaped oak box with label inside lid, torn at left border. On the label is an extensive tabulation of various European gold and silver coins with their legal weights. - 826 Germany, 19th century. Large double pan balance. 6½ in. beam with 3 in. diameter cup type brass pans attached by chains. Housed in a plain metal box with a single hinge. Set of miscellaneous loose weights. These include 3 different in ounces, 6 different sizes in pennyweights, and 4 different in grains. All weights are stamped GERMANY indicating they were made to be exported, probably to America. Fine overall.
- 827 Large double pan balance with 7 in. beam and 3½ in. brass pans connected with chains. No box or identification, but similar in workmanship to last; thus probably made in Germany in the mid-19th century for export to America. Good condition overall.
- 828 Double pan balance. 6½ in. brass beam and 2½ in. glass pans, one of which is broken in half. Stamped August Sauter/Eb-ingen on beam. German scale, probably late 19th century. This would be Fine were it not for the broken pan.
- 829 Large Japanese double pan balance gold scale. 17 in. brass beam with 7 in. diameter copper dished pans connected by heavy black rope. Oriental trade mark stamped in center of each pan. Of unknown age and origin, possibly 18th century. Should be examined. Fine.

## Colonials

### Choice Oak Tree Shilling—Noe-14

- 841 **1652 Oak Tree shilling, Noe-14.** EF-40, deep bluish gray, unusually clean and attractive. Very light evidence of clipping at top, not affecting any of the design, nearly full outer border beads. The famous *Spiny Tree* variety. All branches are straight and covered with spines, as if the engraver were trying to alter the oak into a pine. Believed to have been the last oak variety (struck about 1667) just before the changeover to the pine tree style.

### Beautiful Pine Tree Shilling

- 842 **1652 Pine Tree shilling, Noe-5.** AU-50, beautiful deep bluish gray toning, slight waviness to planchet. Dies of Noe-4, but weakened and reengraved, late die flaw through M. A handsome example indeed of the large size pine tree shilling—the most famous and storied of all American colonial coins.

*Note: These were deliberately struck at ¾ the weight of an English shilling in an attempt to keep them from being exported or melted. Nevertheless many ended up in the West Indies where certain islands made them legal tender. Strangely enough, much of the silver for the New England coinage came from the West Indies, especially Jamaica, in exchange for cargoes of salted fish shipped out of Boston. Noe relates that the silver often came from pirates who captured and raided treasure-laden Spanish ships in the Caribbean.*

- 843 **1652 Pine Tree sixpence, Noe-33a.** Choice VF-30, dark gray, light waviness to planchet. The planchet is too small for the dies as always, but unusually well centered. At least half of THVS is on the planchet. Thought to be contemporaneous with the large size shillings struck from 1667 to about 1669, but at least 10 times rarer; in fact this is the rarest of the three denominations of this type.

- 844 **1652 Pine Tree threepence, Noe-36.** Fine-12, medium gray, bent and straightened. Also struck during the 1667-1669 period, the time of the large size pine tree shillings, but these dies were prepared earlier and were originally intended for an oak tree threepence. Note that the reverse lettering is similar to that used on the oak tree issues, and also the pine tree on the obverse appears to have been engraved on the die over an oak. The usual rim break above AS is visible.

- 845 (1688) American Plantations token. AU-50, never in circulation, a few black tin pests from exposure to cold on the reverse near border. Restrike in tin, made about 1828 by English coin dealer Matthew Young from original dies, later distributed by W. S. Lincoln & Son. Ex Charles Ruby sale, Part 1, Lot 18, originally from French's in 1946.

- 846 **1722 Rosa Americana twopence, uncrowned rose type.** Choice VF-30, scattered areas of black patina over a light brown base, but far above average for Rosa Americana issues, which are usually badly corroded due to decomposition of the zinc component in this Bath metal alloy. From the Charles Ruby sale, Part 1, Lot 19.

- 847 **1722 Rosa Americana penny.** AU-50, dark mottled olive with traces of lustre, originally obtained as "Uncirculated." Regular type with U's in both legends, 2 rosettes in reverse legend, period after REX. Also from Dr. Ruby (Lot 24) and likewise very rare and desirable at this grade level.

*Note: Possibly struck in 1723 as the London Post of January 18, 1723 related, "In about a week's time he [Wood] will begin to coin at Bristol pieces for America which will be made of a beautiful compound metal." The alloy referred to may have been beautiful when struck but it quickly corroded. The alloy was very soft, allowing the coins to be finely struck in high relief without much wear and tear on the dies, which of course meant a greater profit to Wood. The flans were also reportedly heated prior to striking to make them even softer.*

- 848 **1722 Rosa Americana penny.** EF-40, dark charcoal patina. Same type, with the rosette after AMERICANA punched over a smaller one. Ex Ruby, Lot 23.

### Rare 1783 Chalmers Shilling

- 849 **1783 Chalmers shilling**, short worm variety. VF-20, medium bluish gray, central details weak from die failure, faint old scratch above left bird. Excellent centering on a perfectly round planchet, edge coarsely reeded, probably with a file. Although these were lightweight, they circulated widely and were far preferable to the worn and cut Spanish dollars (often cut into 5 "quarters" by unscrupulous persons) then common in circulation. Another highly underrated coin. There are less than 100 survivors of both varieties put together. From Dr. Ruby, Lot 38, ex Barney Bluestone, May 28, 1948.

### Classic 1776 Continental Dollar

(See Color Photo)

- 850 **1776 Continental dollar, Newman 1-C, the CURRENCY variety struck in pewter**. EF-40, many moderate edge bumps and cuts, and a few spots of corrosion. The designs for this historic issue were copied from the Continental Currency fractional paper issues, authorized February 17, 1776. The workman-

ship on the dies is very amateurish with many spelling and spacing errors, and the entire composition looks very much as if it was created by an engraver rather than an experienced die sinker.

- 851 **1785 Nova Constellatio, pointed rays, Crosby 3-B. AU-50**, reddish brown with a faint suggestion of underlying lustre. Extensively rusted dies, broken on wreath above date. From Dr. Ruby (Lot 125 at \$500.00) who obtained it from Henry Chapman before 1935 as "Uncirculated. Splendid sharp impression. Beautiful color." One of the finest known of this date, which is usually seen in F-VF, occasionally in EF, but which is very rare above that.

*Note: The obverse (rays side) was originally used on the 1785 IMMUNE COLUMBIA pattern by Wyon; the reverse die (wreath side) was later muled with the blunt rays CONSTELLATIO obverse to produce Crosby 1-B. These coppers were struck in large quantities and shipped over here sometime in late 1785. But the market value for them collapsed around June, 1787, after which time they could no longer be passed at full value. The inevitable result of this is that they were bought up in quantity at a steep discount and used as planchets for various State coppers.*

- 852 **1785 Nova Constellatio, pointed rays, another Crosby 3-B.** Choice EF-45, excellent chocolate brown color and surfaces, tiny clip over JUS. Early die state with the break on the wreath above date less pronounced and much less rust distortion in rays and letters than the previous lot. Another beautiful specimen of this issue.
- 853 **1785 Nova Constellatio, pointed rays. Crosby 4-D.** Choice VF-30, charcoal brown, very finely porous, but beautiful mark-free surfaces. Rusted and clashed dies with the wreath boldly incused around the rays; the local weaknesses are from die failure due to the injuries. From Dr. Ruby (Lot 127) who obtained it from Chapman as "Very Fine, steel color."
- 854 **1787 Massachusetts half cent.** EF-40, dark brown, two shallow obverse scrapes.
- 855 **1788 Massachusetts cent.** VF-20, dark grayish brown with a few areas of light porosity, but nothing serious. Dies by Jacob Perkins with the peculiar Ss which look like 8s. Period after Massachusetts.
- 856 **(1786) Connecticut copper. Miller 5.3-N, the Hercules head type.** Choice VF-30, light brown, planchet defect above head. The weakness at central reverse is caused by too much metal going to the head on the other side, which was cut too deeply into the die. Heavily clashed dies, especially on the reverse where denticles are boldly impressed above the head. The two dies came together at least three times while aligned badly off-center without a planchet in between. Date and tops of CON-NEC are off the planchet, as often found on this variety. From Dr. Ruby (Lot 56), ex Wayne Raymond sale February 18, 1947 at \$45.00. In the Ruby sale it was claimed that this could very well be the finest known of the variety.
- 857 **1786 Connecticut. Mailed bust left, Miller 5.8-O.2.** VG-8 or better, very attractive dark brown with blue-gold overtones. Ex Ruby, Lot 54.
- 858 **1787 Connecticut. Small mailed bust right; ETLIB INDE** with no punctuation. Miller 1.1-A. Fine-12, light brown with signs of shallow porosity. Far above average for this popular type. Ex Ruby, Lot 57.

- 859 1787 Connecticut, draped bust left. Fine-12, light brown with a couple of scratches and some light roughness, as made.
- 860 1787 New Jersey copper. Maris 56-n. VF-20, chocolate brown with no defects. Struck upside down over a Connecticut copper, with traces of the legend AUCTORI CONNEC visible on obverse, 178 of date and INDE visible on reverse. One of the *camel head* varieties (note snout in high relief) struck in 1789 at Machin's Mills near Newburgh, N.Y. but deliberately backdated to 1787. These are always struck over other worn out coppers.

- 861 (1792) Kentucky Pyramid token, plain edge. **MS-60, Uncirculated**, toning a dull grayish brown with traces of mint red surviving in areas. Undated, but believed to have been struck just after Kentucky's admission to the Union as the 15th state in June, 1792. Most of these are EF-AU, showing that this issue circulated very little, if at all, and probably not at all anywhere near Kentucky.
- 862 (1792) Kentucky Pyramid token, thick flan, edge lettered PAYABLE IN LANCASTER LONDON OR BRISTOL. MS-60, Uncirculated, the mint red has faded to violet and gold. A minor edge defect and a few reverse scrapes.
- 863 1794 Talbot, Allum & Lee cent. EF-40, mottled shades of brown and olive, fairly clean except for an insignificant obverse rim bump. Fuld-2 variety with & small on obverse and large on reverse.
- 864 **Mark Newby farthing**, struck sometime in the 1640s, although the *Guide Book* continues to date these 1678. VF-20 with greenish brown patina, none of the roughness seen on most of these. Struck slightly off center towards 12:00. Usual type with periods in legends. Bought up in quantity by Mark Newby and imported to west N.J. where these circulated for over a century.

*Note: Mark Newby was a Quaker who left Ireland in hopes of finding religious freedom in America. He along with four other Irishmen and their families sailed from Dublin about 1681 for America, going around Cape May and up the Delaware river, finally settling near Salem, N.J., reportedly the only town in the area at that time. The farthings were originally struck in vast quantities (there are more than 140 different die varieties!) but almost all have disappeared, and they are rare today, rarer for example than a Pine Tree shilling.*

- 865 1723 Wood's Hibernia halfpenny. MS-63, Uncirculated, iridescent brown with some mint red in protected areas.
- 866 1723 Hibernia halfpenny. EF-40, light brown with choice surfaces. *The rare variety with no period after date.* Ex Dr. Charles Ruby sale, Part 1, Lot 33.
- 867 1760 Voce Populi ("Voice of the People") halfpenny. Choice VF-30, usual soft strike (the dies were cut far too deeply to fully bring up the design on a single blow of the press) but excellent surfaces and color. Ex Ruby, Lot 110, who reportedly bought it at a 1945 Mehl sale, although the original Mehl envelope is missing.
- 868 1794 Franklin Press token. Choice AU-55, dark greenish brown with faint bluish overtones. Perfect obverse die with no sign of the usual die break through the press. The obverse leg-

end roughly translates to: "Thus learning arises and Liberty flourishes" (as a result of the printed word).

- 869 1783 Washington cent, small military bust, plain edge, Baker-4A. Choice VF-30, dark olive and free of defects. Ex Ruby, Lot 131, from B. Max Mehl, November 28, 1945 sale, Lot 968 (original envelopes accompany). In the Ruby catalogue it was pointed out that the small bust type is possibly 50 times rarer than the large bust type.

- 870 1783 Washington cent, draped bust, restrike in silver. **Proof-55**, light toning, plain edge. Vlack 3-B. Struck about 1858 for the well-known British dealer W. S. Lincoln, apparently from original dies that were heavily reworked to restore lost detail. Type of Baker-3.
- 871 1783 Washington UNITY cent. EF-40, dark olive with fairly clean surfaces. Usual file marks near borders (noted long ago by Crosby); possibly the planchets were treated before striking to look old. Obverse very similar to the draped bust cents, the reverse obviously copied from a U.S. large cent with UNITED changed to UNITY in a feeble attempt to avoid possible trouble with the authorities.

- 872 1791 Washington cent, small eagle, Baker-16. **AU-50**, beautiful bluish brown surfaces, usual lettered edge. From the same obverse die later used on the 1793 Washington ship halfpenny; note the word PRESIDENT with the R high and distant from the E. Scarce and very underrated, these were bringing \$25 at auction over a century ago! Ex Dr. Ruby, Lot 141.
- 873 1791 Washington cent, large eagle, Baker-15. **AU-50**, olive and brown with gorgeous gold, rose and blue overtones. The obverse die was later used on the Liverpool halfpenny after it became clear that Congress was not interested in a contract coinage. Also from Dr. Ruby, Lot 139.

*Note: Baker relates that the portrait of Washington seen on these pieces was based on a drawing from life in Philadelphia in the winter of 1778-1779 by Pierre Eugene du Simitiere, a Swiss who had settled in Philadelphia about 1766. It became known in Europe through an engraving published in Madrid in 1781, and in Paris and London in 1783. The original is now lost but prints from the engraving have survived.*

**Extremely Rare Washington Half Dollar  
Struck in Copper**

(See Color Photo)

- 874 **1792 Washington half dollar, small eagle, struck in copper. Baker-24, large planchet, plain edge. VF-20**, evenly worn with absolutely no defects, medium brown. Struck in John Harper's cellar, a block from the future Philadelphia Mint, under supervision of Adam Eckfeldt. This is thought to be a pattern for presentation to Congressmen then debating the original Morris bill. Washington rejected his own portrait on the coin as too monarchical and reportedly indignantly ordered the dies destroyed, although we know that they survived until at least 1795. Most of the estimated 100 pieces minted went into circulation, but were later retrieved as souvenirs and curiosities. The size of the piece, the fact that there is no stated denomination, the eagle on the reverse, and the fact that some were struck in silver, together imply that the dies were intended for a pattern half dollar rather than a cent. The fact that there are 15 stars above the eagle on the reverse implies to us that the dies were completed sometime after June of 1792 when Kentucky became the 15th state. *The most interesting and historically important of all Washington pieces.* From Dr. Ruby, Lot 146, who obtained it from a Bolender mail bid sale about 1953.

- 875 **1793 Washington ship halfpenny, Baker-18, usual lettered edge. AU-50** or so, rich chestnut brown with most of the ship's rigging visible on the reverse. Also from Dr. Ruby (Lot 144) who obtained it from B. Max Mehl on November 28, 1945.

*Note: From the identical obverse die used earlier on the 1791 Washington large eagle cents. Vlack has conjectured that these ship halfpennies were struck on behalf of Daniel Eccleston, a wealthy Liverpool admirer of Washington.*

- 876 **1795 Washington grate halfpenny token, large buttons variety, diagonally reeded edge, Baker-29. MS-63, Uncirculated, red and brown.** Issued by the firm of Clark and Harris at 13 Wormwood St. in the Bishopsgate district of London.
- 877 **1795 Washington grate halfpenny token, same variety as last. MS-63, Uncirculated**, a beautiful prooflike bluish brown. Early die state with no sign of the usual break at FIRM. Struck in Birmingham by the same mint that produced the Liberty & Security issues, probably Kempson & Son. Another choice colonial from Dr. Ruby, Lot 149. In the Ruby catalogue it was stated that this was purchased from Walter F. Webb, Rochester, N.Y. on January 19, 1946, but the original envelope has been lost.

- 878 **1787 Fugio cent. Pointed rays, STATES UNITED type, Newman 13-X. MS-60, Uncirculated**, dull brown with a couple of darker stains, and a small planchet defect left of the sun. Usual clashed dies with the spaces inside the rings very prominently embossed on the obverse. 550.

- 879 Group of three half cents: (1) 1800 VG-8; (2) 1804 Spike chin VG-8; (3) 1833 EF-40, marks. (Total: 3 pieces)

884 1837 Half cent token, the type pictured in the *Guide Book*. Choice EF-45 or better, bluish brown with some underlying lustre and traces of mint red. Strangely enough, these circulated widely as half cents during a period when the mint could not sell its own product. An inexpensive item of great historical interest.

885 1837 Half cent token, same type. EF-40, brown with traces of green patina around letters.

## Large Cents

886 1855 AU-50.

887 1794 S-41. Good-4, central reverse much weaker and nearly worn smooth. Average surfaces, light brown color.

Sharpness of VF but there is a cut at B of LIBERTY. Stemless wreath, double fraction bar type with the last S in STATES punched much too low, then corrected. (Total: 3 pieces)

893 1820 Choice AU-55 with claims to Uncirculated. Randall hoard variety.

894 1839 Booby head. MS-60, Uncirculated, softly struck, dipped with a resulting pumpkin color.

895 **1850 MS-65, Uncirculated**, mostly golden-red, starting to tone down, one obverse spot.

*Note: The bulk of the cent and half cent planchets during this period were supplied to the mint from Crocker Bros. of Taunton, Massachusetts who made the planchets from copper imported from Peru. The mint often paid for the blanks with coined cents. For each pound of planchets shipped to the mint, Crocker Bros. could take either 28 cents in cash (gold and silver) or 31 cents in coined large cents. Since there were nearly 42 planchets per pound of copper, the mint still managed to make a modest profit on the deal. The only condition was that Crocker Bros. had to distribute the cents at face value only; no discounts of any kind were allowed.*

896 **1851 MS-63, Uncirculated**, mint red and olive with a minor abrasion on neck. A lovely large cent.

*Note: The discovery of gold in California in January, 1848 seriously upset the legal ratio between gold and silver. Silver rose in value versus gold with the result that U.S. silver coins were hoarded and began to be exported to Asia and Europe. This explains why the mint concentrated on copper and gold coins in 1851 and 1852. Over 9.8 million 1851 cents were struck, the largest mintage of any date.*

897 **1852 MS-63, Uncirculated, full mint brilliance on obverse**, the reverse is toning to a deeper rose.

*Note: By late 1852 the price of a pound of copper planchets delivered to the mint had risen to 32 cents versus only 28 cents a pound in the 1849-1851 period. By mid-1853 the*

*price had climbed to 42 cents per pound which meant that the government was taking an absolute loss on each cent coined. This eventually forced an end to the copper coinage in 1857. To put these high copper prices in perspective, one need only recall that as late as 1960 raw copper was selling for only 32 cents per pound, and in 1933 it hit bottom at a ridiculously low 4.9 cents per pound.*

898 **1853 MS-60, Uncirculated**, deeply toned to a reddish olive.

899 **1854 MS-63, Uncirculated, full mint red**, an unspotted and uncleaned beauty. Much rarer with original red than dates like 1852, 1855, and 1856.

900 **1855 Upright 5s in date. MS-63, Uncirculated**, over 50 percent of the original mint red has survived. Common hoard variety with the minute die chips on neck. A half a dozen minor spots are scattered over the obverse.

901 1856 Slanting 5. MS-63, BU. Usual weak strike at top of head and upper stars.

1053 **1884 Proof-63, Brilliant.** 1884 has always caught the attention of collectors. Mintage this year was a paltry 8,875 (the odd 875 pieces being the Proofs). The mints were so busy cranking out Morgan dollars there was little time to strike lesser denominations. The present coin has deep mirror surfaces offsetting white frosted devices. Only the faintest hairlines keep us from designating the grade Proof-65 or better.

### Scarce MS-65 1886-O Dollar

- 1201 **1886-O MS-65, Brilliant Uncirculated.** Lovely surfaces. 1886-O is common in circulated grades. However, Uncirculated is another story. Most sold as "Unc." are in reality "sliders." The present MS-65, BU must be seen to be appreciated. Well worth stretching for.
- 1202 1886-S MS-63, Brilliant Uncirculated.
- 1203 1887-O MS-65, Brilliant Uncirculated. Prooflike.

- 1209 **1889-O MS-65, Brilliant Uncirculated. Full strike.** Much, much rarer than a "typical" strike for the date. In demand from knowledgeable collectors.

- 1225 1898-S MS-65, Brilliant Uncirculated.

1226 1899 Proof-50, minor edge marks.

1227 1900 Proof-50, minor edge marks.

*Note: The several Proof dollars displaying edge marks came about these defects in a rather unusual way. The owner had his coin collection mounted in plaques on his wall. His method of adhering the coins to the plaques? The use of tacks! Two or more to a coin (usually at top and bottom). The marked dollars in this section come from this famous collection. They are still presentable and much less expensive than higher grade specimens would bring on today's market.*

1228 1900 Proof-50, toned. Edge marks.

1229 Three MS-63, BU Morgans: 1900, 1901-O and 1902-O. (Total: 3 pieces)

1241 1923-S MS-63, Brilliant Uncirculated, rubbed in right obverse field.

1242 Four 1924 dollars, all Choice AU-55. (Total: 4 pieces)

1243 1924-S MS-65, Brilliant Uncirculated.

## Trade Dollars

1246 1873-S EF-40, light toning.

1247 1874-CC Choice AU-55, some lustre, a few tiny abrasions.

1248 1874-CC MS-63, Brilliant Uncirculated. Unusual condition for a CC.

1249 1875-S over CC variety. MS-60, Brilliant Uncirculated. Usual reverse die breaks at right, bold raised dot on crossbar of 7 in date. Listed as R-7 in *Scott's Encyclopedia* but that rarity rating needs to be revised.

1250 1875-S AU-50, cleaned.

1251 1876 Proof-65, brilliant. Reverse die from the Type 2 hub with no berry under claw of eagle. Only 1,150 pieces struck and always a popular type coin.

1252 1877-S EF-40, signs of cleaning, gold toning.

1253 Pair of trade dollars: 1877-S and 1878-S. Both are EF-40 and cleaned. (Total: 2 pieces)

- 1254 **1878 Proof-55**, with lovely smoky gray and blue toning. No significant hairlines or contact marks; this was never in circulation but is downgraded to 55 level only because of some minor cloudiness in fields, possibly due to poor storage. *Only 900 pieces reported for this Proof-only date.*

- 1255 **1879 Proof-60**, deep mottled iridescent toning. By 1879 the trade dollar was finished as a bullion coin for the Orient; hereafter pieces would be struck only in Proof for collectors.
- 1256 **1879 Proof-60**, a blindingly brilliant coin that has undoubtedly been polished but which is amazingly free of serious hairlines.

- 1257 **1881 Proof-63**, smoky gray toning with some blue-gold iridescence. Only 960 pieces bearing this date were struck making this the same rarity as the 1895 dollar. Now that Morgan Proofs have risen dramatically in value, we expect these scarce trades to follow suit.

- 1273 1926 EF-40, natural color.

## *Three-Dollar Gold Piece*

- 1274 **1878 Choice AU-55**, prooflike with contact marks.

## *Half Eagles*

- 1275 **1852-C AU-50**, brilliant prooflike surfaces peppered with many tiny contact marks. Plenty of glitter remains and the piece has an attractive olive tint. The date is prohibitively rare better than this, which makes this well worth bidding for.
- 1276 1880 Fine-12.
- 1277 1891-CC MS-60, Brilliant Uncirculated. Both Cs in mintmark are nearly closed making this look more like "OO."
- 1278 1897 AU-50, reddish tint.

THANK YOU FOR YOUR PARTICIPATION!

## Eagles

### Beautiful 1797 Heraldic Eagle

(See Color Photo)

- 1284 **1797 Heraldic eagle reverse. Choice AU-55**, beautiful olive-gold color typical of these early gold pieces. The first use of the heraldic eagle design on this denomination. Note the extra long neck to the eagle seen only on gold and silver coins before 1798. For some reason, Scot was told to shorten the neck sometime in 1798. The reverse die was prepared after the decision had been made to limit the number of stars to 13, although it was muled with an obverse die with 16 stars (10x6). A few of the stars on the obverse are unusually small; either these were punched into the die too lightly or they were partially polished away after the die had been completed. A romantic early gold piece which has always been one of the best investments one can make in numismatics. In addition, 1797 is much scarcer in all grades than dates like 1799 or 1801 or even 1795.

### AU 1799 Ten Dollar Gold Piece

(See Color Photo)

- 1285 **1799 Choice AU-55**, attractive, though not quite the equal of the preceding piece. Tiny file mark on edge (test mark?) not visible from either side. Short neck to eagle (compare to the previous 1797), large stars on obverse as in 1800 and later dates. 1799 also comes with much smaller stars like those on the 1797. Probably struck in 1800 from a left-over 1799 obverse die.

- 1286 1882 Choice EF-45, with considerable lustre.  
1287 1894 MS-60, Brilliant Uncirculated, usual bagmarks.  
1288 1907 Indian type. AU-50.  
1289 1908-D With motto. AU-50, a reddish gold beauty.  
1290 1914-D Choice EF-45, beautiful mark-free surfaces.  
1291 1926 MS-63, Brilliant Uncirculated.  
1292 1932 MS-63, Brilliant Uncirculated.

## Double Eagles

- 1293 1873 AU-50.  
1294 1874-S MS-60, Brilliant Uncirculated, bagmarks especially noticeable on obverse.  
1295 1876 AU-50, usual bagging.  
1296 1877-S AU-50, heavy bagmarks with an obverse pinscratch. It is doubtful if many of these pieces ever saw hand to hand circulation. Most of them have been shipped from vault to vault so many times that the surfaces have acquired too many bagmarks to be classed as BU.  
1297 1878 AU-50, another deserving of the same comment.  
1298 1879 AU-50, similar.  
1299 1881-S AU-50, prooflike with heavy bagmarks. Light rose toning. This must have been a beautiful coin when it left the dies.  
1300 1883-S AU-50, moderate bagging.  
1301 1884-S Choice AU-55, another piece undoubtedly pulled right out of a mint bag in this condition.  
1302 1885-S MS-60, Brilliant Uncirculated. The distinction between AU and BU on these is often the number and severity of bagmarks.

Dear Mr. Bowers:

*I just yesterday returned from my first experience at a major coin auction which you held in Hollywood. I had sent a few coins of my own, since in my short six years of collecting I had never really sold any coins, and I wish to report to you that I was extremely pleased with the results and prices realized on my lots.*

*Additionally, I bought a few coins and wish to compliment you and your entire staff on the efficient and pleasant way you handled the viewing of coins and the auction itself.*

*All your people were most accommodating and since this was a new experience for me, I thoroughly enjoyed the four days I spent over there at the auction.*

*As I mentioned to you, I think it is a commendable thing that you have employed so many young people in your business, and you can tell by their enthusiasm that they enjoy what they are doing. Too often in this day and age you find people serving the public with a chip on their shoulders and acting as though they were doing you a favor.*

*Again, my thanks for a very pleasant experience. —an unsolicited testimonial from R.B. of Phoenix, Arizona*

- 1303 1888 Choice AU-55, another piece which has not circulated but which is not Uncirculated!
- 1304 1889-S Choice AU-55, this is BU with usual heavy bagmarks and a larger abrasion on cheek.
- 1305 1890-S AU-50, similar story. The reverse could be graded Brilliant Uncirculated.
- 1306 1891-S Choice AU-55, similar.
- 1307 1892-S AU-50, this one may have circulated.
- 1308 1893 AU-50, the reverse is BU.
- 1309 1893-S MS-60, BU, usual bagmarks.
- 1310 1894 Choice AU-55, bagmarks. One wonders if silver coins of the 1955-1964 period will be only known in similar condition to collectors fifty years from now.
- 1311 1894-S Choice AU-55.
- 1312 1895 Choice AU-55, the reverse could be graded MS-63, BU!
- 1313 1896 Choice AU-55, possibly should be called BU, and certainly better than most of the "BU" pieces offered by bullion dealers.
- 1314 1896-S Choice AU-55.
- 1315 1897 AU-50, heavy bagmarks.
- 1316 1897-S AU-50, another typical example of a bullion coin famous and instantly recognizable in any corner of the world, from Argentina to Zurich.
- 1317 1898 AU-50, this actually circulated for a few years.
- 1318 1898-S MS-60, Brilliant Uncirculated, sharply struck.
- 1319 1899 MS-60, Brilliant Uncirculated.
- 1320 1899-S Choice EF-45 or better. We are not convinced this ever really circulated.
- 1321 1900 MS-63, Brilliant Uncirculated.
- 1322 1900-S AU-50, cleaned.
- 1323 1901 Choice AU-55, the reverse is a beauty!
- 1324 1901-S AU-50, die crack joins bottom of date.
- 1325 1902-S AU-50. It is interesting that most of the .900 fine gold being auctioned by the Treasury these days was once in the form of double eagles. Like Morgan dollars, the mintage figures on these are totally meaningless because of the large scale meltings.
- 1326 1903 MS-65, Brilliant Uncirculated, only minute evidence of having been in a mint sack.
- 1327 1903-S MS-60, Brilliant Uncirculated. The bagmarks are numerous but not severe.
- 1328 1904 MS-60, Brilliant Uncirculated, quite attractive.
- 1329 1904-S AU-50, another where a convincing case could be made to call it BU.
- 1330 1906 AU-50, the reverse is BU. One of the few late dates not considered simply as a bullion coin.
- 1331 1906-D AU-50, obverse scratch. First year the Denver Mint joined in on these.
- 1332 1906-S VF-20.

- 1333 1907 Liberty type. MS-60, Brilliant Uncirculated.

**Gem MCMVII High Relief**

(See Color Photo)

- 1334 **MCMVII High Relief double eagle. MS-67, Brilliant Uncirculated**, beautiful satiny olive surfaces free of nicks and abrasions. Probably should be called the flat edge variety, although there is a trace of a wire rim on the reverse at 6:00. Beyond a doubt the most beautiful U.S. coin ever intended for circulated, although the high relief was totally impractical from a technical point of view. The edge is lettered E PLURIBUS UNUM using a collapsible segmented collar. The gold type collector could never hope to own a finer High Relief than Lot 1334!

- 1335 1907-D Liberty type. MS-60, Brilliant Uncirculated.
- 1336 1907-S Liberty. MS-60, Brilliant Uncirculated.
- 1337 1907 Saint-Gaudens type with arabic numerals and flat relief. AU-50.
- 1338 1908 No motto. MS-60, Brilliant Uncirculated.
- 1339 1908-D No motto. AU-50.
- 1340 1908 With motto. AU-50.
- 1341 1909/8 Overdate. Choice EF-45, olive-gold toning.
- 1342 1909 EF-40.
- 1343 1909-S MS-63, Brilliant Uncirculated.
- 1344 1910 AU-50.
- 1345 1910-D Choice AU-55.
- 1346 1910-S MS-60, Brilliant Uncirculated.
- 1347 1911 AU-50.
- 1348 1911-D MS-63, Brilliant Uncirculated.
- 1349 1911-S MS-63, Brilliant Uncirculated, blazing lustre.
- 1350 1912 MS-60, Brilliant Uncirculated, slightly scarcer date.
- 1351 1913 AU-50.
- 1352 1913-D Choice AU-55.
- 1353 1914 EF-40, a few reverse abrasions.
- 1354 1914-D MS-60, Brilliant Uncirculated.
- 1355 1914-S Choice AU-55.
- 1356 1915-S Choice AU-55, claims to BU.
- 1357 1916-S MS-60, BU, a few moderate abrasions.
- 1358 1920 Choice AU-55.
- 1359 1920 AU-50.
- 1360 1922 AU-50.
- 1361 1923 Choice AU-55.
- 1362 1923-D AU-50.
- 1363 1924 MS-65, Brilliant Uncirculated.
- 1364 1924 Choice AU-55.

- 1365 **1924-D Choice AU-55**, much of the mintage of 3 million was undoubtedly melted after 1933.

- 1366 1925 MS-60, Brilliant Uncirculated, usual bagmarks.

- 1367 **1925-S AU-50**, signs of light cleaning (not serious). Another date that was melted in quantity.

- 1368 1926 MS-63, Brilliant Uncirculated.

### Choice 1926-S Double Eagle

*(See Color Photo)*

- 1369 **1926-S MS-65, Brilliant Uncirculated**, a few of the inevitable obverse abrasions, but an attractive specimen of this date.
- 1370 1927 MS-60, Brilliant Uncirculated.
- 1371 1928 Choice AU-55. The most common of all U.S. gold coins.

## Commemorative Coins

- 1372 1892 Columbian half dollar. MS-65, Brilliant Uncirculated, soft bluish silver. These were sold at the World's Exposition in Chicago in 1893 and later released into circulation in quantity at face value. Much scarcer in this beautiful grade than most of the later commemoratives with much smaller mintages.
- 1373 1893 Columbian. MS-65, Brilliant Uncirculated. A nice companion piece to the preceding, from the same collection. Worn pieces of this issue were actually common in circulation until the 1950s.
- 1374 1936 Elgin. MS-65, lightly toned Uncirculated. Note the peculiar look on the pioneer's face.
- 1375 1926-S Oregon. MS-63, toned Uncirculated. One of the more artistic designs in this series.
- 1376 Pair of Pilgrim half dollars: (1) 1920 MS-60, BU; (2) 1921 EF-40. (Total: 2 pieces)
- 1377 1926 Sesquicentennial. MS-60, Brilliant Uncirculated.
- 1378 1922 Grant Memorial gold dollar. MS-63, BU.

- 1379 1922 Grant Memorial gold dollar, with star. MS-63, Brilliant Uncirculated, a couple of obverse hairlines are visible under a glass. These commemorative gold dollars are interesting, as they represent a denomination obsolete since 1889.

### Fantastic 1904 Lewis and Clark

(See Color Photo)

- 1380 1904 Lewis and Clark gold dollar. MS-69, Brilliant Uncirculated, a glittering jewel! These have always been known as rarities, and this piece is one of the finest the commemorative collector is ever likely to encounter.

### Choice 1905 Lewis and Clark

- 1381 1905 Lewis and Clark gold dollar. MS-65, Brilliant Uncirculated. A beautiful companion piece to the preceding; for the serious connoisseur. These were struck for the 1904-5 Lewis and Clark Exposition held in Portland, Oregon to mark the centennial of the two explorers' legendary adventures.
- 1382 1903 Louisiana Purchase gold dollar, obverse with bust of Jefferson. Choice AU-55.
- 1383 1903 Louisiana gold dollar, obverse bust of McKinley. AU-50.
- 1384 1916 McKinley Memorial gold dollar. MS-60, Brilliant Uncirculated, with pleasing light rose toning.

- 1385 1917 McKinley gold dollar. Choice AU-55.

- 1386 1915-S Panama-Pacific Exposition gold dollar. Choice AU-55, with strong claims to Uncirculated.

### 1915-S Panama-Pacific Quarter Eagle

(See Color Photo)

- 1387 1915-S Pan-Pacific Quarter Eagle. MS-63, Uncirculated, light toning over soft satiny lustre. The interesting reverse appears to have an eagle perched atop a city street sign! This was one of George T. Morgan's last creations.
- 1388 1926 Sesquicentennial quarter eagle. Choice AU-55. The reverse features Independence Hall which appears to be sunken into the field of the coin (tilt the coin at an angle). The same basic design idea was reused on the 1976 bicentennial half dollar despite an open competition; the mint bought back its own design!

## Miscellany

- 1389 California Gold quarter dollar, round type, no date, probably struck about 1853. Obverse with head of Liberty loosely imitating that on the double eagle, surrounded by 11 stars; crude wreath on reverse with denomination and star. AU-50, prooflike with choice olive color, slightly bent.
- 1390 1859 Pattern half dollar. Judd-237, struck in silver with a reeded edge. Proof-60, brilliant but hairlined. The reverse design with its cereal wreath was copied from the dimes and half dimes of the day, after it was noticed that these struck up better than the quarters and halves with the eagle.
- 1391 1859 Pattern half dollar. Judd-235, silver with reeded edge. The Paquet design with fasces and shield. Proof-50, deep steel, blue and gold toning with hairlines on obverse, although much of the proof surface is intact. *An incredible wire rim with a portion at 11:00 on the obverse being nearly a full millimeter from the field of the coin!* Really a mint error caused by extra metal being squeezed between the die and the close fitting collar upon striking. A very interesting piece for the student of minting technology.
- 1392 Pair of early half cents. (1) 1794 VG-8, porous; (2) 1795 lettered edge. VG-8. (Total: 2 pieces)
- 1393 Four one-cent pieces: (1) 1858 Large letters. VF-20; (2) 1858 Small letters. Fine-12; (3) 1863 Copper-nickel AU-50; (4) 1908-S Fine-12. (Total: 4 pieces)
- 1394 1873 Indian cent. Proof-55, lightly toned.
- 1395 Proof Lincoln cents: (1) 1939 Proof-65, brilliant; (2) 1940 Proof-65, mottled toning; (3) 1941 Proof-65, brilliant; (4) 1942 Proof-65, brilliant. Frosted devices. (Total: 4 pieces)
- 1396 Group of twenty-five 1939-D Lincoln cents. Grades range from MS-63 to MS-65, BU. (Total: 25 pieces)
- 1397 1873 Two-cent piece. A Proof-only year. Closed 3 variety. **Proof-60**, toned. Some minor spotting.
- 1398 1889 Nickel three-cent piece. Choice AU-55.

- 1399 1868 Shield nickels. Pair grading EF-40. Each has recut date (a common happenstance on early shield nickels). (Total: 2 pieces)
- 1400 1911 Liberty nickel. Proof-65, lightly toned.
- 1401 1911 Liberty nickel. Proof-63, brilliant. Obverse carbon spot.
- 1402 1911 Liberty nickel. MS-63, BU. Minor spotting.
- 1403 Two Liberty nickels: (1) 1911 MS-60, deeply toned Uncirculated; (2) 1912 AU-50. (Total: 2 pieces)
- 1404 1912 Liberty nickel. MS-60, deeply toned Uncirculated.
- 1405 Group of buffalo nickels: (1) 1914-S EF-40, polished; (2) 1917-D Good-4; (3) 1923-S VF-20; (4) 1924-S Good-4; (5) 1926 MS-60, BU; (6) 1927-D VF-20; (7-9) 1927-S Three pieces. One VF-20 and two VG-8; (10) 1930-S VF-20; (11-12) 1931-S Two pieces in Fine-12 condition; (13) 1934 AU-50. (Total: 13 pieces)
- 1406 1942 Jefferson nickel. Type 1. Proof-65, brilliant.
- 1407 1814 Capped bust dime. Lovely AU-50 with light peripheral toning. A lustrous specimen, last sold in our Krugjohann sale. A perfect compromise between high grade and modest price.
- 1408 1806/5 Overdate. Draped bust quarter. Again, a splendid specimen from our Krugjohann sale. Attractive type coin featuring the bold heraldic eagle reverse. Excellent strike and surfaces.
- 1409 1938-S Washington quarter. MS-67, Brilliant Uncirculated. A beauty.
- 1410 Trio of half dollars: (1) 1826 VG-8; (2) 1833 VG-8; (3) 1854 Arrows. EF-40, obverse "X" scratch. (Total: 3 pieces)
- 1411 1844-O with boldly recut 44 of date (extra 44 cut into the base of Liberty's rock). VG-8.
- 1412 1879-O dollar. MS-63, Brilliant Uncirculated.
- 1413 1885-S dollar. MS-65, Brilliant Uncirculated.
- 1414 1887-S dollar. MS-63, Brilliant Uncirculated.
- 1415 1890-O dollar. MS-65, Brilliant Uncirculated. Lovely surfaces. Typical centers for this date.
- 1416 1902 dollar. MS-67, Brilliant Uncirculated.
- 1417 1874 Annual assay medal struck in silver. Housed in its original case of issue. Ornate designs featuring Archimedes. Very rare in silver—possibly no more than two dozen are known! Proof-65, lively multi-colored toning.
- 1418 1874 Annual assay medal struck in bronze. Same designs as preceding. Proof-65, bronzed surfaces (giving a matte-like effect). Quite beautiful.
- 1419 1874 Annual assay medal struck in white metal. Very rare in this metal. Proof-55, brilliant. Only the lightest signs of handling.
- 1420 1927 Lincoln medal, struck by Thomas Elder. Struck in gold. Matte Proof-63. A few minute hairlines. Slightly smaller than a dime. From our Blauvelt sale where it realized \$55. Worth more today.
- 1421 1976 U.S. gold bicentennial medal. 23mm. Proof-67, brilliant. Housed in original wooden case of issue.
- 1422 (1945) Saudi gold "coin." Used to pay for oil during the late 1940s. 493.1 grains gross weight, 452.008 grains net weight. Lustrous AU-50.
- 1423 1847 Hawaii one cent. Bust of Kamehameha III. Crosslet 4 in date. AU-50, once cleaned. Toning nicely.

- 1426 Hawaii. **Waterhouse token.** Circa 1860s. Large, well designed token issued by John T. Waterhouse (Honolulu merchant in the 1850s, 60s and 70s). Bust of Kamehameha IV on the obverse. JOHN THOMAS WATERHOUSE IMPORTER. HALE MAIKAI (Hawaiian for "GOOD HOUSE" meaning a good place to do business). Beehive and bees in center. As Kamehameha died in 1863, it is believed that the token was issued before this time. **Lustrous AU-50**, well struck (Kamehameha's nose is usually unrecognizable) and with fully outlined nose. Worth over \$500.
- 1427 Pair of rare and unlisted bronze medals from the Rochester Fair of 1873. One is awarded to Phelps and Colvin for their exhibit of guns and pistols. The other, also to Phelps and Colvin, for their exhibit of washing machines (a marvelous, time-saving device for the housewife of the period). Both appear as Matte Proofs and are holed at top. 51mm. diameter. (Total: 2 pieces)  
*Note: Ex Roy Harte Collection sale.*

# Photograde

by James F. Ruddy

In today's market grading is especially important. You need a grading guide that is easy to understand, easy to use, and accurate. You need *Photograde*!

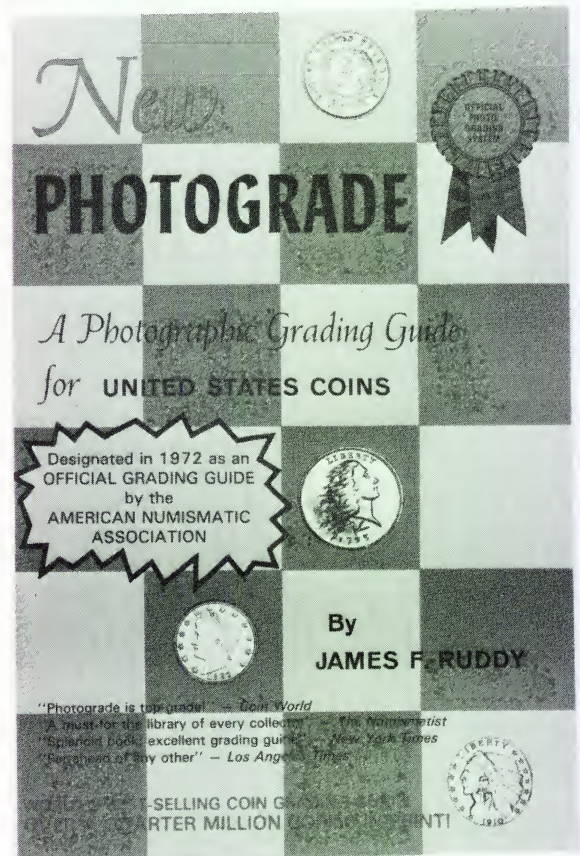

In August, 1970, the first edition of *Photograde* by James F. Ruddy, made its appearance. In 1972, it received the outstanding honor of being designated as an official grading guide by the American Numismatic Association. Now, a brand new edition of *Photograde* is available, combining the traditional *Photograde* features with a cross reference to the new ANA grading system (based on the 70-point scale).

In one volume you have over 1,000 sharp photographic pictures of United States coins, from half cents to \$20 gold, plus colonials. Match your coin to the photograph and you have it graded in a few moments! It is so simple even a beginner can use it, and so accurate the most expert numismatist will find it constantly useful. A description of each coin's principle characteristic accompanies the illustrations.

*Photograde* has over a quarter million copies in print—far exceeding any other grading guide ever published! It has been enthusiastically acclaimed everywhere. Just listen to these comments!

*The New York Times* said: "Grading is most important to all collectors, whether a beginner or a veteran of many years. James F. Ruddy has filled a great need in numismatics with his splendid book, *Photograde*, an excellent grading guide for those who specialize in United States coins."

*Coin World* said: "Opening *Photograde* is like opening a cabinet of actual coins. Its definitive, true photography (a new concept) combines with clear, crisp text to provide an invaluable working tool for the collector and dealer. *Photograde* is top grade!"

*The Numismatist* said: "A must for the library of every collector, beginner or advanced, of United States coins."

The brand-new edition of *Photograde* is more useful than ever and it is now available for just \$3.95.

# High Profits from Rare Coin Investment

by Q. David Bowers

— Brand New Edition,  
Published November 1978 —

Just published by Bowers and Ruddy Galleries is the brand-new edition of our very popular *High Profits from Rare Coin Investment*. This, the third major revision of Q. David Bowers' investment guide, is packed with up-to-date statistics compiled from a variety of sources. Now, in this edition, comparative coin price-growths span three decades, from 1948 through 1978.

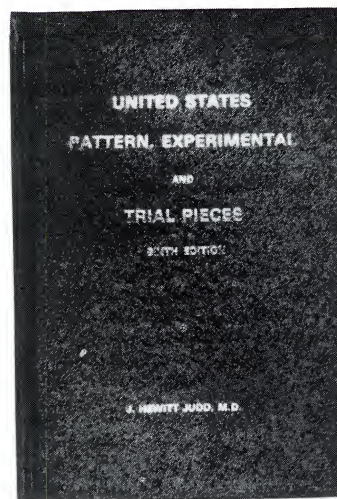

Topics covered in detail include a general, introductory discussion of coins as an investment (to bring the person new to numismatics up to a level where he can begin to understand the mechanics of the rare coin market), a brief history of the progression of numismatics from a pastime to a field ripe for big-time investment opportunities, a series of answers to the most commonly asked questions about coins as an investment medium, a general history of American coins and currency, a suggested approach to building a significant collection/investment portfolio of rare coins, and areas where specialized investing is possible.

Aside from the facts and figures, Dave Bowers provides a lively, highly readable text which is filled with personal anecdotes and insights. Bowers has often been called "the expert's expert," and while reading his book you are sure to understand why: it contains the kind of information which comes only after years of concentration upon a subject—true expertise! Many pictures and charts round out the wealth of information found inside the bright, new covers of this latest edition of a numismatic best seller—one you'll surely profit from having on your shelf. Order one right away!

Paperbound. 208 pages with many illustrations. A quality publication from Bowers and Ruddy Galleries. Priced at just \$6.95 per copy, postpaid.

# United States Pattern, Experimental and Trial Pieces

by J. Hewitt Judd

Newest (sixth) edition of *the essential patterns book*. A quality hardbound book of 276 pages listing all known varieties of United States pattern coins. While this book is fundamental to the formation of a collection of patterns, it is also loaded with information for the general collector who wishes to understand why coin designs are selected and what designs *almost* appeared on our national coinage. Highly recommended for all collectors and investors!

Hundreds of photographic illustrations, along with price revisions on many varieties and even some additional pieces which appeared first in this edition, make the book easy to use and most valuable. Designers and the varieties they created are discussed in detail. Periods are described, and most years' issues are prefaced by an introduction which explains how and why they came to be.

The book's introduction narrates the history of pattern collecting in America, mainly as it derived from the famous Adams and Woodin reference on patterns, the only other such book ever published (which the present volume made obsolete by its more thorough investigation of the series). Also explained are such criteria as rarity, values, and numismatic oddities listed in various appendixes to the book. This is a reference we have always highly recommended as background reading. Available for \$17.95 per copy, postpaid.
